Full-Stack Developerr | Next.js, Node.js, PostgreSQL | Building Scalable Web Applications

Education

IMS Engineering College Ghaziabad Ghaziabad, India
Bachelor of Technology in Computer Science and Design; GPA: [7.3] *Jan 2022 – Aug 2026*

- Relevant Coursework: Data Structures and Algorithms, Database Management, Web Technologies, Software Engineering

Technical Skills

Languages: JavaScript, Python, Java, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs
Database: MongoDB, MySQL
Tools & Technologies: Git, GitHub, npm, VS Code, Postman, Docker, PostgreSQL
Core Competencies: Full-Stack Development, Problem Solving, Data Structures & Algorithms, Agile Development

Experience

Full-Stack Developer Intern June 2025 – Aug 2025
DEHIX *Ghaziabad, India*

- Developed and deployed full-stack web applications using React, Node.js, and MongoDB, improving application performance by implementing efficient data handling and responsive UI components
- Collaborated with cross-functional teams to design and implement RESTful APIs, enabling seamless frontend-backend integration and reducing data retrieval time by 30%
- Utilized Git for version control and participated in code reviews, ensuring code quality and adherence to best practices in a collaborative development environment
- Applied Agile methodologies to deliver features iteratively, enhancing team productivity and project delivery timelines

Projects

Career Guidance Web Application GitHub: github.com/Gagan875/Career-Guidance
React.js, Tailwind CSS, JavaScript, Node.js, MongoDB

- Developed a one-stop personalized career and education advisor platform (mobile and web) that guides students in choosing suitable subject streams, degree programs, and career pathways based on aptitude, interests, and local opportunities, helping improve enrollment in government colleges and reduce dropouts.
- Built a responsive user interface using Tailwind CSS, achieving a 95+ Google Lighthouse performance score and following mobile-first design principles.
- Optimized the MongoDB database using compound indexes and aggregation pipelines, reducing complex query execution time by 45%.

Job Application Tracker GitHub: github.com/Gagan875/job-tracker
Next.js, TaiwindCSS, TypeScript, Node.js, Express.js, PostgreSQL

- Developed a full-stack Job Tracker application using Next.js, Node.js, and PostgreSQL to manage job applications and interviews.
- Implemented secure authentication using JWT and bcrypt with protected API routes.
- Designed analytics dashboard to track application progress and response rates.
- Built RESTful APIs with Prisma ORM and optimized data handling using React Query.

Achievements & Leadership

- Solved 100+ problems on competitive programming platforms, demonstrating strong algorithmic thinking
- Actively contributed to open-source projects on GitHub, collaborating with global developer communities
- Participated in university hackathons and technical workshops to stay current with emerging technologies
