PROJECT

Sentiment Analysis Model

- Developed a sentiment analysis model using Python (NLTK, scikit-learn, pandas) trained on a 10k+ dataset of movie reviews from Kaggle, classifying sentiments as positive or negative
- Implemented Logistic Regression with TF-IDF vectorization (ngram_range=(1,2)) achieving high accuracy in sentiment prediction.
- Built a Flask API for sentiment analysis, integrated with Node.js (Express.js) and React.js frontend for real-time prediction.
- Saved trained model and vectorizer using pickle for deployment

EduVerse — E-Learning Platform Frontend | *React.js, Google Cloud Run* Live

- Built a multi-role e-learning frontend (Student, Instructor, Admin) with 10+ pages including dashboards, video lesson player, quiz engine, discussion forum, course catalog, and admin user management
- Implemented role-based navigation, progress tracking UI, course creation forms, and demo login system
- Containerized and deployed on **Google Cloud Run** (GCP) with public HTTPS access

SKILLS

Languages : C , Java , Javascript , Python
Frontend : React.js , HTML, CSS
Backend : Node.js , Express.js, Rest APIs, JWT
Database : MongoDB , MySQL
Tools : GIT, GitHub, Postman , Jest
Concepts : Data Structures & Algorithms , OOPs, DBMS

EDUCATION

- Shobhit Institute of Engineering and Technology, Meerut
  B.Tech , Computer Science & Engineering 2023 - Present
  CGPA : 8.21/10
  Coursework : Data Structures , Algorithms, DBMS , Operating System

- Modern Academy , Gaya , Bihar
  Intermediate 2023
  CBSE Board | Science Background | 61.4%

- Lord Buddha Public School , Aurangabad , Bihar
  Matriculation 2021
  CBSE Board | 71.83%
