Krishna Kanhaiya Jha

Meerut, UP, India | kkjha181856@gmail.com | +91-9608751163 | LinkedIn | GitHub

Professional Summary

Bachelor of Technology student in Computer Science and Engineering with proficiency in Python, NumPy, Pandas, Matplotlib, Seaborn, and Scikit-learn. Hands-on experience building machine learning models, data analysis pipelines, and computer vision applications. Solid understanding of data structures, algorithms, and statistical computing. Eager to contribute as a Data Science Intern by extracting actionable insights from data in a collaborative, research-oriented environment.

Education

Shobhit Institute of Engineering and Technology — Meerut, UP

Bachelor of Technology – Computer Science and Engineering | *CGPA: 7.85/10* — 2023 – Present

– Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Discrete Mathematics

Technical Skills

Programming Languages: Python, C, C++, JavaScript (basic)
Data Analysis & Visualization: NumPy, Pandas, Matplotlib, Seaborn
Machine Learning: Scikit-learn, regression, classification, model evaluation, cross-validation
Computer Vision: OpenCV, MediaPipe, image preprocessing, landmark detection
Data Structures & Algorithms: Arrays, Linked Lists, Trees, Recursion, Sorting, Dynamic Programming
Databases: MongoDB, SQL (basic), data querying and aggregation
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Generative AI & LLMs: Prompt engineering, large language model fundamentals

Projects

Eye-Controlled Virtual Mouse | *Python, OpenCV, MediaPipe* | GitHub — Jan 2024 – May 2024

– Designed a real-time computer vision pipeline using MediaPipe facial mesh to detect 468 eye landmarks per frame; mapped gaze-vector coordinates to screen positions, achieving accurate hands-free cursor control.
– Applied image preprocessing techniques including grayscale conversion and ROI extraction to improve tracking stability and reduce processing overhead.
– Built modular architecture separating detection, mapping, and control layers for maintainability.

E-Commerce Website | *HTML, CSS, JavaScript* | GitHub — Aug 2023 – Dec 2024

– Developed a responsive multi-page e-commerce frontend with dynamic product listings and cart functionality.
– Used CSS Grid and Flexbox with mobile-first design principles for cross-device compatibility.
– Designed scalable structure for future backend integration.

Tower of Hanoi – Algorithm Visualizer | *C, Python*

– Implemented recursive solution demonstrating backtracking and time complexity $O(2^n)$.
– Logged execution steps to validate correctness and analyze performance.

Certifications

Python Programming | Udemy | Verify Credential

MongoDB Toolkit | GeeksforGeeks | Verify Credential

Career Essentials in Generative AI | Microsoft & LinkedIn Learning | Verify Credential

Data Analytics | LinkedIn Learning | Verify Credential

Leadership & Activities

Winner – University Treasure Hunt — 2024

– Demonstrated strong problem-solving, logical thinking, and teamwork under time constraints.

Strategy Leader – Yoga Club, Shobhit University — 2024 – 2025

– Managed planning, scheduling, and team coordination for student wellness activities.
