PROFILE

Full-stack Ai developer skilled in MERN stack with experience building scalable web applications and AI-powered systems using RAG, LangChain, and vector databases. Developed projects featuring multi-LLM integration, optimized performance, and secure backend architectures. Solved 200+ DSA problems.

SKILLS

Languages : C++, JavaScript(ES6+), TypeScript, Python

Frameworks & Technologies : React.js, Node.js, Express.js, JWT, HTML, CSS, Tailwind, MongoDB, MySQL, REST APIs

Tools & Concepts : Git, Redis, Redux, CI/CD, Jest, OOPS, GenAI, Postman, RAG, LangChain, Pinecone

EXPERIENCE

Prodesk IT Jan 2026 – may 2026

Full Stack Intern Noida, UP

- **Developed full-stack web applications** using the MERN stack, implementing debounced search that reduced redundant API calls by **40%** and improved responsiveness
- **Engineered infinite scroll functionality** for seamless data loading, decreasing initial page load time by **35%** and enhancing user experience
- **Implemented secure authentication mechanisms** using Redis-based token blacklisting and rate limiting, reducing unauthorized requests and improving API stability
- **Built an AI-powered agent** using RAG architecture with LangChain, Pinecone vector database, and Gemini embeddings, improving query relevance and response accuracy

PROJECTS

CrimeAlert | *React.js, Node.js, Express.js, MongoDB, REST APIs* | Live

* Built an **anonymous crime reporting platform** with secure token-based authentication, admin verification, and full CRUD operations for posts, comments, and reactions
* **Designed a scalable backend** using MongoDB aggregation pipelines and optimized search with debouncing, reducing redundant queries

Hexa.ai | *React.js, Node.js, Express.js, MongoDB, API Integration, GenAI Integration* | Live

* Built a **unified multi-AI chat platform** integrating ChatGPT, Gemini, and DeepSeek APIs
* **Implemented model switching and multi-model chat**, enabling users to interact with one or multiple LLMs simultaneously via toggle controls
* **Maintained separate conversation histories** for each LLM using MongoDB for context-aware and personalized interactions

TMDB Movie App | *React.js, TMDB API, REST APIs* | Live

* Built a movie discovery platform using **TMDB API**, implementing debounced search and infinite scroll, reducing API calls by **40%** and improving load performance by **35%**
* Developed a **mood-based recommendation system** to personalize content, enhancing user engagement through dynamic filtering and real-time results

EDUCATION

Shobhit university Jul 2023 – Jun 2026

Bachelor of Computer Application Meerut, UP

* **Coursework**: Data Structures, Algorithms, Databases, Computer Systems, Web Technologies
* **CGPA**: 8.45/10
