PROFESSIONAL SUMMARY

Entry-level SOC Analyst (BCA 2026) with hands-on experience in **Splunk-based SIEM monitoring, log analysis, and threat detection** via internship at **Haryana Police Cyber Cell (GPCSSI), Gurugram**. Skilled in XSS/SQL Injection investigation, alert triage, and incident documentation. ISC2 Candidate certified. Familiar with Wireshark, Nmap, MITRE ATT&CK, VirusTotal, and AbuseIPDB. Seeking entry-level SOC Analyst / Junior InfoSec roles in Delhi NCR.

TECHNICAL SKILLS

SIEM & Monitoring:	Splunk (SPL Queries, Dashboards, Alerts), Log Analysis, Security Event Monitoring, Alert Triage
Threat Detection:	XSS, SQL Injection, Brute Force, Phishing Analysis, IOC Documentation, MITRE ATT&CK Framework
Network Security:	Wireshark, Nmap, TCP/IP, DNS, Packet Analysis, Port Scanning
Security Tools:	VirusTotal, AbuseIPDB, OSINT Tools, Windows/Linux Log Parsing
Incident Response:	SOC L1 Workflows, Alert Triage, Incident Documentation, Digital Forensics Basics
Programming:	Python, MySQL, HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Cyber Security Intern — GPCSSI, Haryana Police Cyber Cell, Gurugram

June 2025 – July 2025

- Performed real-time log analysis using **Splunk dashboards and SPL queries** to detect suspicious authentication patterns and potential security incidents on government systems.
- Investigated real-world web attack logs (**XSS, SQL Injection**); documented attack patterns, vectors, and mitigations in structured incident reports.
- Supported **alert triage and incident documentation** following SOC escalation workflows; mapped threat behaviors to **MITRE ATT&CK** tactics.
- Gained hands-on exposure to **digital forensics evidence handling** and chain-of-custody practices used in active cybercrime investigations.

PROJECTS

SOC Log Analysis & Threat Detection Using Splunk

2025

- Analyzed multi-source security event logs to detect **brute-force login attempts and abnormal authentication patterns**; built custom Splunk alerts and dashboards for real-time monitoring.
- Applied SPL to parse and correlate log data, producing actionable threat summaries aligned with SOC L1 workflows. **Tools:** Splunk, SPL, Windows/Linux Event Logs.

Phishing Email Header Analysis & IOC Investigation

2025

- Parsed raw email headers and MIME metadata to trace spoofed sender domains and extract malicious URLs/IPs; verified IOCs via **VirusTotal and AbuseIPDB**.
- Produced incident report documenting IOCs, MITRE ATT&CK technique mapping **(T1566)**, and recommended defensive countermeasures.

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Shobhit Institute of Engineering and Technology, Meerut, UP

CERTIFICATIONS

- **ISC2 Candidate Certification** — Cybersecurity Principles & Global Security Standards
- **Introduction to Cybersecurity** — Cisco Networking Academy
- **Cybersecurity Fundamentals** — Simplilearn
- **National Security & Digital Forensics Workshop** — Government of India (Hands-on Forensic Investigation)
