Education

Raj Kumar Goel Institute of Technology(AKTU) — Ghaziabad, IN
Bachelor of Technology in Computer Science | CGPA: 8.0 — *September 2022 – August 2026*

Saraswati Vidya Mandir(CBSE) — Ghaziabad, IN
84.00% in Senior Secondary — *April 2021 – April 2022*
87.00% in High School — *April 2019 – April 2020*

Experience

HR Leave Management Model | AI Intern | *Python, FAISS, Sentence Transformers* — July 2025
Remote - Netcamp Sol. Pvt. Ltd. — *Ghaziabad, IN*

- Developed an HR Leave Management model aligned with company-specific policies to automate employee leave queries.
- Built a Retrieval-Augmented Generation (RAG) pipeline using **FAISS and sentence transformers** to enhance response accuracy with contextual knowledge retrieval.
- Optimized **prompt chaining** and LLM routing, improving response accuracy and latency.
- Enhanced chatbot performance through efficient **prompt optimization** and response processing, resulting in faster and more reliable outputs.

Projects

Dev Tinder 🔗 | ***ReactJS, MongoDB, Express.js, DaisyUI, Razorpay, Socket.io***

- Tinder-style web app to connect developers, featuring a dynamic feed, swipe-to-connect functionality, and connection requests handled via **REST APIs**.
- Integrated Razorpay **Payment Gateway**(99% success rate) to purchase Gold and Silver membership.
- Real time **chat functionality** using Socket.IO(achieved low-latency).
- It features robust **user authentication** using **JWT**, along with secure form validation and password protection powered by Validator and bcrypt libraries in JavaScript.

AnnaData 🔗 | ***ReactJS, Node.js, Express.js, MongoDB, REST APIs***

- Developed a farm-to-consumer marketplace platform enabling farmers and customers to connect seamlessly through a responsive MERN-based application.
- Built scalable backend services and **REST APIs** for product listings, order management, and user interactions with optimized database queries.
- Implemented secure **user authentication and authorization** using JWT along with protected routes and encrypted password storage.

Technical Skills

Languages: C++, Python
Frameworks/Libraries: React.js, Express.js
LLM Tools: LangChain, OpenAI API, Hugging Face
Database: MongoDB, MySQL, FAISS
Developer Tools: Git, GitHub, VS Code, Postman
Coursework: Data Structures and Algorithms, Object-oriented Programming, DBMS
AI Tools: Cursor AI, Github Copilot

Achievements

Technical Achievements

- Led a 4-member team to Top 5% finish among 500+ teams in the State-Level AI-Ideathon Hackathon.
- Solved 150+ DSA problems on LeetCode and GfG.
- Led 4-member team for AI-based Healthcare project as Major Project leader.

Certifications

- **Programming in Python - NPTEL**
- **Generative AI - Simplilearn**
