EDUCATION

Raj Kumar Goel Institute Of Technology,
AKTU|*2022-2026*
B.Tech in Computer Science
8.6 CGPA

CERTIFICATIONS

- Introduction to Java, Learn Quest Coursera
- course of Alpha (DSA with Java).
- Full-Stack Development, LinkedIn

SKILLS

Skills & Course Work: SQL | HTML | CSS | C | Java script |Data Structures and Algorithms | Excel | Operating System | DBMS | Design and Analysis of Algorithms | Python | Java

PROJECTS

Image Classification using KNN on MNIST Dataset (January-2025)

- Designed and implemented comprehensive image preprocessing and feature engineering pipeline using NumPy and Matplotlib to understand and manipulate both grayscale and RGB image formats. Explored the role of color channels in image representation, and applied transformations to generate augmented image datasets, enhancing the diversity and robustness of training data.
- Built and evaluated a K-Nearest Neighbors (KNN) classifier on the MNIST dataset for handwritten digit recognition. Used Keras's Image Data Generator for real-time data augmentation, and applied performance evaluation techniques to measure model accuracy. Demonstrated proficiency in classical machine learning algorithms, image handling in Python, and end-to-end workflow of a vision-based classification task.

Movie Ticket Booking Website (2024)

- Designed and developed a full-stack movie ticket booking platform that allowed users to browse movie listings, select show timings, choose seats visually from an interactive layout, and generate digital tickets upon confirmation.
- Integrated key features such as real-time seat availability checks, booking confirmation via email, and a fully responsive design that ensured seamless usability across mobile devices, tablets, and desktops.

Book Store (2023)

Created a dynamic e-commerce web application for browsing and purchasing books categorized by academic departments like CSE, IT, etc. Enabled real-time data rendering using frontend technologies and ensured smooth interaction between frontend and backend components.

- Implemented advanced filtering options (by author, department, price range) and shopping cart functionalities that supported add-to-cart, quantity updates, and checkout simulation, enhancing the overall user experience

J.A.R.V.I.S(2025)

- Worked on the development of a multimodal AI assistant inspired by J.A.R.V.I.S., integrating speech, text, image, and video processing. Contributed to frontend design and backend coding using React.js, Python, and deep learning frameworks (TensorFlow, PyTorch, OpenCV). Implemented modules for speech recognition, NLP, OCR, and computer vision. Focused on real-time automation tasks (voice control, reminders, IoT integration) and scalable system design. Collaborated in a team environment, handling both design and coding responsibilities while ensuring module integration and testing.

ACHIEVEMENTS

Quizpedia E-Quiz Participant – Computer Society of India (CSI)| *Sept 2023*

- Participated in a national-level online quiz competition organized by the Department of CSE, RKGIT in association with CSI (Sept 2023).

TechnoHacks-Web Design and Development
