VANSH TOMAR

Delhi, India • +91 7310595598 • vanshtomar7351@gmail.com • linkedin.com/in/vansh-tomar-385b8b252

PROFESSIONAL SUMMARY

Detail-oriented Information Technology student with hands-on full-stack web development experience specializing in modern web technologies and scalable application architecture. Skilled in designing secure REST APIs, implementing robust database solutions, and building efficient backend systems. Recognized for strong analytical thinking, debugging business-critical software errors under pressure, and producing clean, maintainable code.

TECHNICAL SKILLS

Core Languages: JavaScript (ES6+), Java, Python, HTML5, CSS3

Databases: MongoDB, MySQL (Relational Database Management Systems)

Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems

Soft Skills: Analytical Problem Solving, Critical Thinking, Self-Learning, Team Collaboration, Adaptability

TECHNICAL PROJECTS

API-Integrated Interactive Dashboard & Chatbot JavaScript, HTML5, CSS3

- Architected an interactive dashboard system featuring an integrated chatbot to execute automated real-time data retrieval streams.
- Engineered live data ingestion models to instantly fetch, parse, and visualize API payloads, elevating system responsiveness and user engagement.
- Created a clean, lightweight, and modular frontend layout structure to maintain optimal UI state management.

Enterprise Billing & Invoice Management System Java, Python, MySQL

- Designed and built a database billing system in Java integrated with a MySQL backend layer to automate invoice generation and client payment reconciliation.
- Developed an operational program script utilizing Python to automatically compute customer transaction totals via structured dynamic entry data forms.
- Pre-coded core pricing metrics directly within script execution models, entirely removing manual input errors to accelerate order checkout workflows.

Heart-Disease-Prediction Flask, OpenAI API, Scikit-learn, Pandas

- Contributed to developing an AI-powered Heart Disease Prediction System by implementing the Flask backend, integrating OpenAI GPT API for automated report-to-feature extraction, and managing data preprocessing and model prediction workflows using Scikit-learn and Pandas.

Tech Stack: Flask, OpenAI API, Scikit-learn, Pandas, NumPy, HTML, CSS, Jinja2, Joblib, Git, GitHub

EDUCATION

Raj Kumar Goel Institute of Technology (RKGIT) 2022 — 2026

Bachelor of Technology (B.Tech) — Information Technology CGPA: 7.0 / 10

PROFESSIONAL CERTIFICATIONS

- Advanced Full Stack Web Development Certification – DUCAT Ghaziabad
- Introduction to Python Programming – Meta Professional Certificate (via Coursera)
- Introduction to Cybersecurity – NIIT Foundation / Cisco Networking Academy Program
