CAREER OBJECTIVE

Aspiring Web Developer with knowledge of both frontend and backend development. Skilled in building responsive web applications using HTML, CSS, JavaScript, React, and Tailwind. Familiar with backend technologies including Java, Node.js, Express.js, and REST APIs. Passionate about developing scalable and user-friendly web applications.

EXPERIENCE

Software Developer Intern - Qmansys Infosolutions | 3 Months Jul 2025 - Oct 2025

- Developed real-time IoT dashboard using Blynk platform
- Displayed live sensor data and alert notifications
- Integrated NodeMCU and sensors for real-time monitoring

TECHNICAL SKILLS

Languages: Java, Python, JavaScript
Frontend Technologies: HTML, CSS, JavaScript, React.js, TailwindCSS, GSAP, LocomotiveScroll
Backend Technologies: Core Java, REST API, Spring Boot (Basic), Node.js, Express.js, OOPS, SDLC
Database: MongoDB, MySQL
Tools: Git & GitHub, Postman, VSCode Editor, IntelliJ Idea, ChromeDevTools

EDUCATION

- **RKGIT, Ghaziabad | Dr. A. P. J. Abdul Kalam Technical University,Lucknow** 2022 - 2026
  B. Tech - Computer Science & Engineering
- **Kendriya Vidyalaya No. 2 Airforce Station Hindan Ghaziabad U.P.**
  CBSE Board (Class XII), Percentage: 80%
- **Kendriya Vidyalaya No. 2 Airforce Station Hindan Ghaziabad U.P.**
  CBSE Board (Class X), Percentage: 80%

PROJECTS

Sundown Studio – Website Clone Jan 2026 – Feb 2026

Tech Stack: HTML, CSS, JavaScript, GSAP, Locomotive Scroll

- Developed responsive website clone with smooth scrolling animations.
- Implemented interactive UI using GSAP.
- Built mobile-friendly layout and optimized responsiveness.

EduNet – Responsive Educational Web Platform Feb 2026 – Mar 2026

Tech Stack: HTML, CSS, JavaScript
Built responsive educational website with modern UI design.
Implemented multi-section layout and responsive design.
Used Flexbox, Grid, and media queries for responsiveness.

IoT Based Sewage Management System — Dashboard Jul 2025 - Oct 2025

Tech Stack: Blynk, NodeMCU, Sensors
Developed real-time IoT monitoring dashboard using Blynk platform
Displayed gas and water level sensor data with alert notifications
Integrated NodeMCU with MQ2, MQ135, and water level sensors for live monitoring

CERTIFICATIONS & ACHIEVEMENTS

- Programming in Python – Meta
- JavaScript Course – Scaler Academy
- Java Course – Mastering the Fundamentals Scaler
- Database Management System – NPTEL (IIT)
- Participated in Blank Coding 2.0, Computer Science Students Society (RKGIT)
