PROFESSIONAL SUMMARY

Results-driven Software Developer (B.Tech IT, 2026) with strong proficiency in Java, Spring Boot, OOP, SQL, and JDBC. Experienced in building scalable, modular backend applications with REST API integration and layered MVC architecture. Proven team collaborator and quick learner seeking a software engineering role to contribute problem-solving skills and build impactful solutions.

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Spring MVC, JDBC, HTML, CSS, Python (Basic)

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), RESTful APIs, API Integration

Database: SQL, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, IntelliJ IDEA

WORK EXPERIENCE

Front-End Developer Intern — Cognifyz Technologies September 2025

- Designed and developed a fully responsive, mobile-first website using HTML5, CSS3, and JavaScript, improving cross-device user experience.
- Built reusable UI components — including navigation bar, cards, forms, and footer — ensuring design consistency across all pages.
- Implemented dynamic client-side interactions via DOM manipulation, event-driven programming, and real-time form validation logic.

PROJECTS

Mood-Based AI Recommender | *Java, Spring Boot, REST API, HTML, CSS* GitHub

- Built a Spring Boot REST API that integrates Google Gemini AI to generate personalized music, movie, and activity recommendations based on user mood input.
- Implemented layered MVC architecture (Controller, Service, DTO) with input validation, try-catch exception handling, and mood-based fallback responses — no database required.
- Delivered a responsive HTML/CSS frontend with JavaScript Fetch API and Swagger UI documentation, enabling full end-to-end demo and API testing.

Car Rental Service | *Java, OOP* GitHub

- Developed a Java console-based Car Rental System using OOP principles to manage cars, customers, and rental transactions at scale.
- Implemented core business logic: car booking, return processing, real-time availability tracking, and full rental history management via a menu-driven workflow.
- Architected a modular class structure (Car, Customer, Rental, CarRentalSystem) to maximize code reusability, readability, and maintainability.

EDUCATION

B.Tech in Information Technology — Raj Kumar Goel Institute of Technology, Ghaziabad 2022 – 2026

CGPA: 7.6 | Relevant Coursework: Data Structures, OOP, DBMS, Computer Networks

Senior Secondary (Class XII) — B Indian Public School, Sultanpur, UP 2021 — 75%

Secondary (Class X) — Saraswati Vidya Mandir, Sultanpur, UP 2019 — 92%

CERTIFICATIONS & ACHIEVEMENTS

- Programming in Python — Coursera
- SQL (Basic) Certificate — HackerRank
- JEE Main Qualifier — Secured merit-based fee waiver seat in the IT department at RKGIT
