PROFILE

Data Analyst Intern with expertise in data visualization, wrangling, statistical data analysis, and predictive modelling. Demonstrates strong problem-solving skills with a keen ability to apply analytical expertise.

PROJECTS

- **AInalysis:**
  Developed an automated ML pipeline that performs data cleaning, exploratory analysis, feature selection, and model building with minimal code. Integrated modular components for end-to-end analytics, enabling faster insights and reproducible workflows.

- **Bank Management System:**
  Developed a database-driven application using Python and SQL for managing banking operations, including account creation, CRUD operations, balance inquiry, deposits, withdrawals, fund transfers, and transaction history. Implemented authentication, error handling, and data validation to ensure data integrity and secure transactions.

- **Business Database Analysis**:
  Analyzed customer behavior and revenue trends using complex SQL queries to optimize sales and marketing. Provided actionable insights on product performance to drive business decisions while maintaining data quality. Also created advanced interactive dashboard using analysis, visualization and ETL process.

EXPERIENCE

Harduganj Thermal Power Station 26 June 2025 – 23 July 2025

As an Intern at the IT department of the Government Organisation, developed professional communication and teamwork skills essential for corporate settings and prepared a report on SAP ERP. Operated the software and managed the data about the import of materials and necessities of the organisation.
