SONU RAUNIYAR

sonurauniyar955@gmail.com 9555011283 sonurauniyar sonurauniyar25

Profile Summary

Highly motivated and detail-oriented fresher with a strong foundation in core Computer Science and Networking subjects. Experienced in deploying containerized applications with Docker and Kubernetes. Strong analytical thinking, good communication skills, and problem-solving ability, dedicated to helping the organization achieve its goals.

Education

Bachelor of Technology (CSE) *Aug 2022 – Present*
Raj Kumar Goel Institute Of Technology *78 %(Aggregate)*

Intermediate, Science *Apr 2020 – May 2021*
G S V S Inter College Maharajganj *85.5 %*

High School , Science *Apr 2018 – May 2019*
Nirmala Inter college Mithaura Maharajganj *90.17 %*

Experience

linkcolorblue

Java Developer Intern | Brandvio - Link *Aug 2025 – Sep 2025*

- Built and deployed a scalable three-tier web app using Docker and Kubernetes.
- Configured networking rules and load balancing for Kubernetes pods, ensuring secure and reliable data flow across mixed media environments.
- Used kubectl logs and Docker logs for application monitoring and debugging across pods.

Projects

Network Monitoring Tool

- Developed a RESTful API backend using Spring Boot to expose real-time network monitoring capabilities.
- Implemented multi-threaded port scanning service using ExecutorService, scanning 1000+ ports concurrently.
- Designed clean JSON REST API consumable by any frontend, Postman, or third-party integration.
- Used NetworkInterface API to enumerate active network interfaces and retrieve real-time interface metadata.
- Followed layered architecture — Controller → Service → Model for clean separation of concerns.

Job Portal Web Application

- Developed a full-stack job portal connecting job seekers and employers using RESTful APIs over HTTP, following proper request-response lifecycle (DNS resolution → TCP handshake → HTTP exchange → response).
- Applied basic network security practices: input validation, rate limiting on login endpoints to prevent brute-force attacks, and HTTPS-ready deployment configuration.
- Tech Stack: HTML, CSS, JavaScript, Node.js, MongoDB.

Technical Skills

Languages : C/C++, **Java 17**, Python, JavaScript, HTML, SQL.

Networking : Networking Protocols, Routing & Switching Concepts, OSI Model, TCP/IP Stack, Subnetting.

AI/ML (Basics) : AI(core concepts), Python(NumPy, Pandas), Scikit-learn, LLM API Integration, Prompt Engineering.

Frameworks & Libraries : Basics of SpringBoot & Spring MVC.

Databases : MySQL, MongoDB.

Tools and Utilities : Postman, Docker, Kubernetes, Git & Github, VS code, IntelliJ IDEA.

Other Skills: OOPs, **Linux Internals**, DSA, API Developement, Web Services(AWS).

Certifications

- **Introduction to Algorithms and Analysis by NPTEL** - Link
- **Data Structures and Algorithms** - Link
- **Docker and Kubernetes** - Link
