HARSH KUMAR

+91 8882946535 | hk22092004@gmail.com | LinkedIn | GitHub | CodingProfile

Education

Raj Kumar Goel Institute of Technology(AKTU) — Ghaziabad, IN
Bachelor of Technology in Information technology | CGPA: 7.04 — *August 2022 – May 2026*

Kendriya Vidyalaya(CBSE) — Ghaziabad, IN
73.6% in Senior Secondary — *April 2021 – April 2022*
80.4% in High School — *April 2019 – April 2020*

Experience

Software Intern — July 2025 – August 2025
NemiVerse (AMSkills Academy Pvt. Ltd.) — *Remote / Noida, IN*

- Worked on the project **"Social Media Sentiment Analysis and Crisis Detection"** under the NEMI AI in Data Science Internship in collaboration with IIT Indore and AKTU.
- Collected and analyzed real-time social media data using the **Twitter API (Tweepy)** and open-source datasets from **Kaggle**.
- Implemented **Natural Language Processing (NLP)** techniques such as tokenization, stopword removal, and lemmatization using **NLTK**.
- Applied **VADER** and **TextBlob** sentiment analyzers to classify data into positive, negative, and neutral sentiments.
- Developed a **Crisis Detection Algorithm** that triggered alerts when negative sentiment exceeded threshold levels.
- Visualized sentiment trends using **Matplotlib, Seaborn, and WordCloud**, generating interpretable graphical outputs.
- Achieved an overall sentiment classification accuracy of approximately **85%**, validating model effectiveness.
- Gained hands-on experience in **Python, Data Science, Machine Learning, and NLP pipelines**.

Projects

Interactive Quiz Web Application | *HTML, CSS, JavaScript* — November 2024

- Developed a responsive web-based quiz app with dynamic questions, real-time scoring, and timer functionality.
- Designed an intuitive and engaging UI using clean layouts and interactive animations for a better user experience.
- Implemented modular and reusable JavaScript code to enhance scalability and maintainability.

Social Media Sentiment Analysis | *Python, NLTK, TextBlob, Tweepy, Pandas, Matplotlib* — August 2025

- Built an NLP-based system using Python, NLTK, TextBlob, and Tweepy to analyze real-time social media data.
- Implemented sentiment scoring, data visualization, and crisis detection through rule-based analysis.
- Visualized sentiment trends and anomalies using Matplotlib and Seaborn.

Heart Disease Prediction System | *Python, Flask, scikit-learn, Pandas, NumPy, HTML, CSS* — October 2025

- Developed a Flask web app to predict heart disease risk using Logistic Regression, Random Forest, and KNN models.
- Implemented data preprocessing, feature scaling, and probability-based predictions for accuracy.
- Designed an interactive interface with Chart.js, form validation, and dynamic result visualization.

Technical Skills

Languages: C/C++, Python, SQL, HTML/CSS
Developer Tools: Flask, scikit-learn, NLTK, TextBlob, Tweepy, Pandas, NumPy, Matplotlib, Seaborn, Chart.js, Jupyter Notebook, VS Code, GitHub
Coursework: Data Structures and Algorithms, DBMS, OOPS, Computer Networks, Operating System

Achievements

Technical Achievements

- Completed a certified training program by NETCAMP focused on Networking and Android Development using Core Java and Android Studio; built and deployed hands-on projects as part of the course.
- Solved 100+ Data Structures and Algorithms (DSA) problems across various coding platforms.
