EDUCATION

Bachelors of Technology in **Information & Technology** (AKTU)
RAJ KUMAR GOEL INSTITUTE OF TECHNOLOGY AND MANAGEMENT, DELHI-NCR, GHAZIABAD
(2022 – 2026)
Senior Secondary (CBSE)
St. P.D. Senior Secondary School, FIROZABAD
(2021 – 2022)

SKILLS & PROFICIENCY

- **Programming Language:** C++ using DSA, SQL,
- **Core Base:** OOPs, DBMS, OS, CN, DSA
- **Tools:** Git & GitHub, VS Code

PROJECTS

✓ **Simple Resume Making Website**
Completed - Role – Design the Whole Project. "Developed a simple resume-making website using HTML, CSS, and JavaScript. Integrated user-friendly forms for data input and real-time preview of resumes. Implemented features like downloadable PDF generation and responsive design, ensuring cross-device compatibility.

✓ **Attendance Management System Using C**
Completed - Role – Write Whole code. Developed an Attendance Management System in C to streamline student attendance tracking and reporting. Implemented features such as real- time attendance recording, data storage, and retrieval. Designed a user-friendly interface and ensured data accuracy, enhancing administrative efficiency and simplifying attendance management processes.

✓ **Vortex**: A Mental Health Discord Bot
Here my Role in this project is to build the backend of bot and design it to make bot user friendly. It helps user to solve their doubts and also provide valid solution regarding their health issues problem. Our plans is to integrate this bot to all social media to make user able to access more efficiently. Here I work & use **PYTHON**, **Gemini APIs** & **Flask** – Backend Web Framework.

INTERNSHIPS

► **Google Cloud Generative AI | Internship**
September,2024 – 31/October/2024
Gained practical knowledge of **Generative AI concepts**, including **large language models (LLMs), prompt engineering, and responsible AI practices** using Google Cloud.
Worked with **Google Cloud Vertex AI** to understand model training, fine-tuning, and deployment workflows.
Learned to design and optimize **effective prompts** to improve AI model responses and performance.
Explored real-world use cases of **Generative AI in chatbots, content generation, and automation**.
Understood the **end-to-end Generative AI lifecycle** on cloud platforms, from data preparation to inference.

► **Google Cloud AI/ML Virtual Internship**
During October – December 2025

Acquired practical knowledge of **machine learning algorithms, data preprocessing techniques, and evaluation methods** through the Google AI/ML Virtual Internship.
Developed foundational skills in **Python-based ML workflows, model training, testing, and optimization**.
