Professional Summary

Full Stack Developer with hands-on experience in MERN Stack and Generative AI. Skilled in building AI-powered web applications, integrating LLM APIs, developing REST APIs, and creating responsive user interfaces. Passionate about solving real-world problems through scalable software solutions and modern AI technologies.

Education

Raj Kumar Goel Institute of Technology (AKTU) 2022 – 2026
Bachelor of Technology in Computer Science Engineering 64% (Current)

Class XII 2022
Percentage: 71%

Class X 2020
Percentage: 66%

Experience

AI Analyst Intern — Qmansys Infosolutions LLP Jul 2025 – Oct 2025

- Participated in an AI-based Fashion Recommendation System project as part of a structured internship program.
- Gained exposure to recommendation systems, machine learning workflows, and AI application development concepts.
- Assisted in project research and solution analysis.
- Collaborated with peers to understand project requirements and implementation approaches.

Technical Skills

- **Languages:** JavaScript
- **Frontend:** React.js, HTML5, CSS3, SCSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, Redis (Basics)
- **AI/LLM:** LangChain, Prompt Engineering, LLM APIs, Google AI Studio
- **Tools:** Git, GitHub, Postman, VS Code
- **Concepts:** REST APIs, Authentication, Full Stack Development

Projects

AI Verse Arena

- Built an AI-powered platform that generates responses from multiple AI models and compares them using an AI Judge system.
- Integrated LLM APIs for response generation, scoring, reasoning, and comparative evaluation.
- Implemented chat history, markdown rendering, dark mode, and responsive user experience.
- Developed backend APIs using Node.js and Express.js.

Perplexity Clone

- Developed an AI-powered search and chat application with authentication and session management.
- Integrated Gemini and Mistral models to improve response quality and reliability.
- Designed a responsive user interface with persistent chat sessions.

- Built backend services and API integrations for AI-driven interactions.

Moodify – AI Music Recommendation System

- Developed a music recommendation platform using facial emotion detection.
- Integrated MediaPipe for recognizing emotions such as happy, sad, and surprised.
- Built backend APIs to recommend songs based on detected emotions.
- Utilized Redis caching for improved performance and session handling.

Certifications

- Oracle Certified Foundations Associate – Oracle (Mar 2025)
- Introduction to Generative AI – Microsoft (Apr 2025)
- Introduction to Artificial Intelligence – Infosys Springboard (Apr 2025)
- AI Computer Vision – UiPath (Jun 2024)
