Technical Skills

Technical Skills: Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Basic Machine Learning (Regression, Classification, Clustering)

Tools & Libraries: Python, SQL, Pandas, NumPy, Matplotlib, Jupyter Notebook, Excel, Kaggle

Languages: Python, SQL , C, C++

Projects

Lazybrains June 2025 – July 2025

Automates end-to-end data cleaning, feature selection, EDA, and ML workflow for efficient preprocessing (Python, pandas, NumPy, scikit-learn, feature-engine, matplotlib, seaborn, plotly) Bengaluru, India

- End-to-End Automation: Preprocesses, cleans, scales, encodes, and imputes tabular data automatically, handling up to 1M rows and reducing manual preprocessing time by ~80%.
- Feature Optimization: Automatically selects relevant features, removing 20–50% of redundant or low-value features to improve model accuracy and training speed.
- Comprehensive EDA & Reporting: Generates detailed visual and statistical reports, detecting missing values, outliers, and correlations across 100+ features.
- Model Training & Explainability: Trains and evaluates 10+ ML models in parallel, providing interpretability via SHAP, ROC, and residual plots, accelerating model selection by ~70%.

Nullpy March 2025 – June 2025

Python library for automatic, intelligent, and ML-powered cleaning of pandas DataFrames, handling missing values, outliers, and target-aware imputations.

- Automatic Cleaning: Detects missing values across 100k+ rows and applies optimal imputation, including predictive ML-based methods, improving data quality by ~90%.
- Outlier Handling: Identifies and treats outliers in 50+ columns using clipping, dropping, or predictive strategies, ensuring robust datasets.
- Target-Aware Approach: Leverages correlations and chi-squared tests to optimize cleaning for all target variables, reducing model training errors by ~15–20%.
- Customizable & Reported: Configurable parameters with clear, interpretable reports; generates summary and difference reports for 100% of processed features.

Executive Member (Co-Lead) of ACETECH 02/2025 - Present

Led and mentored a team in organizing project competitions and local hackathons. Provided coding guidance, suggested optimizations, and evaluated solutions to enhance efficiency. Assisted in planning technical events, workshops, and coding challenges to improve participation.

Education

Raj Kumar Goel Institute of Technology Aug 2022 – Sep 2026

Bachelor of Technology in CSE Data Science Ghaziabad, Uttar Pradesh
