Education

B.Tech in Computer Science and Engineering — **Ghaziabad, India**
Raj Kumar Goel Institute of Technology and Management — *Aug 2023-July 2026*

Diploma in Computer Science and Engineering — **Greater Noida, India**
Lloyd College of Engineering — *Aug 2020-July 2023*

Summary

Enthusiastic, results-driven final-year B.Tech Computer Science Engineering student with hands-on experience from industry internships and academic projects. A detail-oriented communicator with strong problem-solving abilities, quick adaptability, and organized workflows. Seeking an entry-level role in IT, Web Development, or Data to learn from professionals, contribute to team objectives, and deliver impactful solutions that support organizational growth.

Skills

Programming Language: Python, Java, C, C++, PHP
Frontend: HTML, CSS, JavaScript, React.js, Redux,
Databases & Data: SQL, MongoDB, MS Excel
Backend & APIs: Node.js, Express.js, RESTful APIs

Tools & Development Platforms: PyCharm, Jupyter Notebook, VS Code, Git, GitHub
DevOps, Cloud & CI/CD: AWS (S3 – Basics), Google Cloud Platform (GCP), Docker, CI/CD
AI/ML: TensorFlow, NumPy

Experience

AI-ML Intern (Eduskills Foundation) Certificate — **October 2025 – December 2025**
(Virtual) — *Tools Used: Models, Tensorflow*

- Cleaned and preprocessed 50+ datasets using Excel and SQL to prepare ML-ready data pipelines, and built, trained, and evaluated 10+ machine learning models using Python and TensorFlow. Analyzed 5,000+ data records and generated actionable insights to support data-driven decision-making and model optimization.

Foundation of AI (Edunet Foundation) Certificate — **April 2025 – May 2025**
(Remote) — *Tools Used: NLP, OpenCV*

- Completed an AI internship focused on Machine Learning fundamentals and model development. Worked on 3+ projects using supervised learning algorithms. Analyzed 5,000+ data records with Python, NumPy, and TensorFlow, implementing model training, evaluation, and optimization techniques.

Generative AI (IBM) Certificate — **February 2024 – March 2024**
(Remote) — *Tools Used: OpenCV, Keras*

- Completed an internship focused on Generative AI and Large Language Models (LLMs). Built and tested 5+ AI applications using transformer-based models and processed 2,000+ text samples for evaluation, implementing workflows for content generation and AI-powered automation solutions.

Projects

Real-Time Driver Drowsiness Detection System | *PYTHON (OpenCV, Keras, Numpy)* Link **August 2025 – Present**

- Developed a real-time Driver Drowsiness Detection System using Python and OpenCV, achieving 94% accuracy on 500+ samples with alerts triggered within 2 seconds and a 15% reduction in false positives

AI Text-Image Generation | *PYTHON (Tkinter, Torch, Diffusers, Transformers)* Link **January 2025 – July 2025**

- Developed an AI Text-to-Image Generation application processing 1,000+ prompts with <3s response time, built using HTML, CSS, and JavaScript, achieving 100% cross-device compatibility and improving performance by 30%.

Phishing Website Detection System | *HTML, CSS, JavaScript, Python* Link **August 2024 – December2024**

- Developed a Phishing Website Detection System using machine learning to classify URLs, trained on 10,000+ samples achieving 95% accuracy and reducing false positives by 18%, enabling real-time threat detection.

Certifications & Achievements, Activities

- Building LLM Applications with Prompt Engineering — NVIDIA Certificate
- Cybersecurity Course — CISCO Certificate
- A Google search for "Digvijoy Ranjan" lists my LinkedIn profile as the top result for quick professional verification. Click here
