MUSKAN THAKUR

Android App Developer | Kotlin | Jetpack Compose

+91-9319801630 muskan925017@gmail.com linkedin.com/in/muskan925017 GitHub: muskan925017

PROFESSIONAL SUMMARY

Motivated Android App Developer (Fresher) pursuing MCA, with hands-on experience building production-quality Android applications using Kotlin, Jetpack Compose, and Firebase. Demonstrated ability to integrate AI/ML capabilities (ML Kit) and build real-time backend systems. Passionate about clean architecture, intuitive UX, and writing maintainable code. Seeking an entry-level Android Developer role to contribute to impactful mobile products.

TECHNICAL SKILLS

Languages	Kotlin, Java
UI Framework	Jetpack Compose, XML Layouts (Android)
Backend / DB	Firebase (Auth, Realtime Database), MySQL
Libraries	Apache PDFBox(Pdf Manipulation)
Tools & IDE	Android Studio, AVD Emulator, Postman
Core Concepts	OOP, MVVM Architecture Basics, Android App Lifecycle

PROJECTS

ScanifyX — AI-Powered PDF Utility App

Android | Personal Project

Tech Stack: Kotlin • Jetpack Compose • ML Kit • Apache PDFBox • Android Studio

- Architected and shipped a full-featured PDF utility app with AI-powered document scanning, password protection, and auto-summary generation.
- Integrated Google ML Kit for on-device document scanning and text recognition, achieving real-time scanning without server calls.
- Implemented multilingual translation support, broadening the app's accessibility for diverse user bases.
- Used Apache PDFBox for PDF creation, manipulation, and password protection.
- Delivered a clean, responsive UI with Jetpack Compose following Material Design 3 guidelines.

Snivvy — Real-Time Chat Application

Android | Personal Project

Tech Stack: Kotlin • Jetpack Compose • Firebase Auth • Firebase Realtime Database • Android Studio

- Built a WhatsApp-inspired real-time messaging app with custom branding and unique UI, from scratch.
- Implemented Firebase Authentication (phone number/otp) for secure user onboarding and session management.
- Engineered real-time message sync using Firebase Realtime Database with listener-based architecture.
- Designed and implemented all UI screens (chat list, chat window, profile) using Jetpack Compose.
- Applied state management best practices with ViewModel and StateFlow for a smooth, crash-free UX.

EDUCATION

Master of Computer Application (MCA) *Sep 2024 – Jun 2026*

Raj Kumar Goel Institute of Technology, AKTU University

Bachelor of Computer Application (BCA) *Nov 2021 – Jun 2024*

CPJ College of Higher Studies, GGSIPU University

Intermediate (Class XII) — CBSE *Jul 2021*

Govt Girls Senior Secondary School

CERTIFICATIONS & ACHIEVEMENTS

- Mr. & Ms. Coder — Competitive Coding Recognition Award
- Hackathon Participant — Coding Competition
- Cloud Computing — Foundational knowledge in cloud platforms and services
