PROFESSIONAL SUMMARY

DevOps Engineer With practical experience in cloud infrastructure automation using Terraform and Microsoft azure, Proficient in IaC workflows including Terraform init, plan, and apply, with exposure to resource provisioning handling. Contributed to the development of a scalable, cloud-based e-commerce platform as a part of a cross-functional team . Adept at identifying and resolving configuration issues while ensuring infrastructure ready for application deployment

EXPERIENCE

DevOps Engineer Intern — DevOps Insider, Remote **Jan 2026 – Present**

- Provisioned and managed Azure cloud infrastructure on Microsoft Azure using Terraform, implementing Infrastructure as Code (IaC) practices to ensure consistency and eliminate manual errors across environments
- Authored and deployed Terraform configuration files to define Azure resources including resource Groups, Virtual Machines, Virtual Networks, and Storage Accounts using terraform init, plan, and apply workflows
- Managed infrastructure code using Git, maintaining version control and enabling collaborative development through structured branching and change tracking across the DevOps team
- Implemented CI/CD pipeline process to streamline application deployment from deployment to cloud environment, ensuring reliable and repeatable delivery for a cloud based e-commerce platform
- Collaborated with frontend, backend, and database team in a 12-member cross-functional project to ensure infrastructure was properly configured and deployment ready
- Resolved Terraform state management conflicts, Azure permissions issues, and configuration errors, strengthening practical knowledge of cloud infrastructure and DevOps best practices

SKILLS

- **Languages:** Python, HCL(Terraform language)
- **Cloud Platforms:** Microsoft Azure (VNets, VMs, RGs, Storage Account), Azure CLI, Azure Resource manager
- **DevOps & CI/CD Tools:** Terraform, Infrastructure as Code (IaC) , Azure DevOps
- **OS & Scripting:** Linux, Windows Bash scripting.
- **Version Control:** Git, GitHub
- **Tools:** VS Code

PROJECTS

Cloud Infrastructure Automation on Azure Using Terraform

- Designed and automated complete cloud infrastructure on Microsoft Azure using Terraform(IaC), provisioning resources including Resource Groups, Virtual Machines, Virtual networks and Storage Accounts through structured terraform init, plan, and apply workflows
- Implemented GitHub actions CI/CD pipeline to automate infrastructure deployment, integrated with Git version control for structured branching, change tracking and rollback capability across all Terraform configuration
- Resolved Terraform state Management conflicts and configuration errors, ensuring consistent, reliable and repeatable infrastructure delivery across environments

Face Recognition Attendance System

- Developed an automated attendance system using OpenCV, Python and Machine Learning techniques for real-time face detection and recognition
- Implemented Haar Cascade classifier and LBPH (Local Binary Pattern Histogram) for accurate recognition of student/faculty
- Integrated system with MySQL database to store and update attendance records securely

EDUCATION

Raj Kumar Goel Institute of Technology |Ghaziabad, Uttar pradesh **Sep 2022 – June 2026**

B. tech in Computer Science and Engineering (AIML)

CERTIFICATIONS

- DevOps | DevOps Insider **Ongoing**
- Oracle Fusion cloud Application HCM | Forage **march 2025**

Extra-Curricular Activities

Electrazz club – Technical Society

- Guided juniors in sensor integration, and implementation with HC 05 and Arduino
- Introduced platforms like Blynk and thing Speak for real-time Data visualization
