HARSHIT SAINI

AI/ML Engineer | *Data Science* | *Backend Developer*

harshit807saini@gmail.com | +91 98 1011 2192 | Ghaziabad, India 201017 | linkedin.com/in/harshit-saini

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building real-time AI voice systems, speech pipelines, and automated recruitment platforms. Skilled in integrating LLMs, speech-to-text models, and WebSocket architectures to deliver low-latency, scalable solutions. Passionate about leveraging cutting-edge AI to streamline workflows and improve operational efficiency.

SKILLS

Languages: Python, SQL, Java, JavaScript
Frameworks & Libraries: NumPy, Pandas, FastAPI, Node.js, Matplotlib, Seaborn, MediaPipe, Whisper/Vosk
AI/ML & LLMs: Google Gemini, AssemblyAI, AWS Polly, Whisper, LLM Integration, Prompt Engineering
Agentic & Voice Systems: Real-Time Speech Pipelines, Telephony Integration (Tata Tele), Bi-directional WebSocket Architecture, Multi-Model AI Orchestration, Low-Latency Audio Processing
Tools & Platforms: Git & GitHub, VS Code, Jupyter Notebook, Google Colab, MongoDB, Microsoft Excel

EXPERIENCE

Software Developer | Kodrec Technologies Pvt. Ltd. *10/2025 – Present*

- Built a real-time AI voice interview system integrating telephony (Tata Tele), AssemblyAI, and Google Gemini with a bi-directional WebSocket architecture — achieving sub-1.5s response latency, under 200ms message delay, and supporting 100+ concurrent sessions while automating 80%+ of initial candidate screening.
- Developed a multi-model AI cheating detection system using behavioral analysis and LLM-based anomaly detection across multiple response signals, improving detection accuracy by ~40% and overall evaluation efficiency by 60%.

AI Intern | Kodrec Technologies Pvt. Ltd. *04/2025 – 09/2025*

- Contributed to building an AI-based recruitment system for automated interviews using speech-to-text models (Whisper, Vosk) and MediaPipe, supporting 20–30 interviews/day with real-time audio processing.
- Integrated Google Gemini for response evaluation, sentiment analysis, and candidate scoring, improving screening consistency by ~25%.

PROJECTS

AetherDoc – AI Healthcare Assistant (Major Project)

- Built an AI healthcare assistant using LLMs for symptom analysis and real-time guidance, improving response relevance by ~30%.

AI Voice-Based Interview Screening System*(.*https://voice.hiringbots.ai/screeningapp/*)*

- Developed a calling-based AI interview system (Tata Tele, AssemblyAI, Gemini) automating ~80% of screening with ~1–2s latency.

HiringBots – AI Interview Platform *(https://hiringbots.ai/)*

- Built scalable AI interview platform (FastAPI, WebSockets) handling 100+ users with automated evaluation and ~40% improved accuracy.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering *Expected: May 2026* Raj Kumar Goel Institute of Technology, Ghaziabad, India | GPA: 7.9

CERTIFICATIONS

- Introduction to Java — LearnQuest | Nov 2023
- Complete Machine Learning and Data Science | Dec 2024
