Summary

Final-year CSE student with hands-on experience in building **scalable full-stack web applications** using the **MERN stack** and **AI integrations**. Proficient in designing **RESTful APIs**, implementing secure **authentication using JWT**, and deploying applications using **Hostinger, Nginx, and PM2**. Built an **AI-powered resume platform** and optimized frontend performance using **Vite**. Seeking opportunities in **frontend or full-stack development**.

Education

JSS Academy of Technical Education 2022 – 2026
B.Tech in Computer Science and Engineering **CGPA: 7.48**

Sunbeam School 2019 – 2020
12th Science **Percentage: 80.2%**

Projects

Employee Management System [Code] *React.js, Tailwind CSS, Context API, Vite*

- Built a **responsive employee management dashboard** using React.js and Tailwind CSS with a modular, reusable component-based architecture, ensuring scalability and ease of maintenance.
- Implemented **role-based access control (RBAC)** using React Context API, providing distinct dashboards and permission sets for Admin and Employee roles without a backend dependency.
- Developed a complete **task lifecycle management system** with full CRUD operations, enabling admins to create, assign, update, and delete tasks to improve team workflow efficiency.
- Configured **Vite** as the build tool, achieving faster hot module replacement (HMR) and significantly smaller production bundle sizes compared to traditional CRA setups.

AI-Powered Resume Builder [Code] *MERN Stack, Gemini API, Redux Toolkit, ImageKit*

- Developed a **production-ready, full-stack AI-powered resume generation platform** using MongoDB, Express.js, React.js, and Node.js with a clean separation of frontend and backend layers.
- Built a **secure authentication system** using **JWT for stateless session management** and **Bcrypt for password hashing**, protecting all private API routes on both frontend and backend.
- Integrated **Google Gemini AI API** to deliver intelligent, context-aware content suggestions for resume sections, reducing user effort in writing professional summaries and descriptions.
- **Deployed on Hostinger VPS** using **Nginx as a reverse proxy** and **PM2 as a process manager**, ensuring zero-downtime restarts, efficient request handling, and stable production uptime.

Skills

Languages: Java, C, JavaScript, Python
Frontend: HTML, CSS, React, Tailwind CSS
Backend: Node.js, Express.js
Database: MongoDB, MySQL
Tools: Git, GitHub, Docker, Vite, Redux Toolkit

Key Achievements

- Data Structure and Algorithm with Java
- Full Stack Web Development

Specializations & Coursework

Pursuing Honours in Cybersecurity 2023 – 2026
Ongoing

- Coursework includes Information Theory for Cyber Security, Data Encryption, and Compression.

Certifications

- AI Foundations Associate – Oracle
- Data Structures and Algorithms – Apna College
