Professional Summary

Final-year B.Tech (CSE) student at JSS Academy, Noida (CGPA: 7.21) with hands-on experience building **Python Full Stack** applications and scalable backend systems. Proficient in **Django, Django REST Framework, FastAPI, React.js, PostgreSQL,** and **JWT Authentication**. Experienced in integrating **Machine Learning models** (LSTM) into production-ready web applications. Strong foundation in **DSA, OOP, DBMS, and Operating Systems**. Passionate about writing clean, efficient code and delivering impactful software solutions.

Education

JSS Academy of Technical Education — Aug 2022 – Aug 2026
Bachelor of Technology in Computer Science & Engineering | ***CGPA: 7.21*** — *Noida, Uttar Pradesh*

Sunbeam School, Varanasi — 2020
Class XII – Physics, Chemistry, Mathematics (PCM) | ***90.20%*** — *Varanasi, Uttar Pradesh*

Technical Skills

Languages: Python, JavaScript (ES6+), Java, SQL
Frameworks: Django, Django REST Framework (DRF)
Frontend: React.js, Context API, React Router, Bootstrap, Tailwind CSS
AI / ML: LSTM (Deep Learning), NumPy, Pandas, Matplotlib, Scikit-learn
Databases: PostgreSQL, MySQL, Django ORM
Backend: RESTful APIs, JWT Authentication, Session Auth, Pagination, Filtering
Tools & DevOps: Git, GitHub, Postman, VS Code, Linux CLI
Core CS: Data Structures & Algorithms, OOP (4 Pillars + MRO), DBMS, Operating Systems

Projects

Stock Prediction Portal | **Django, DRF, React.js, LSTM, JWT, PostgreSQL** — *Jan 2025 – May 2025*

- Built a **full-stack web application** for ML-powered stock price predictions with secure user registration and login through a responsive React.js interface.
- Implemented **JWT-based authentication** (access + refresh tokens) with protected API routes and token refresh using DRF SimpleJWT.
- Designed RESTful APIs supporting full **CRUD operations**, server-side pagination, filtering, and search using DRF serializers and viewsets.
- Trained and integrated an **LSTM deep learning model** for time-series stock price forecasting using live financial data via Yahoo Finance API.
- Developed a modular **React.js frontend** with Context API for global state, Axios for API calls, and React Router for navigation.

Daily Expense Tracker | **Django, DRF, React.js, PostgreSQL, Bootstrap** — *Aug 2024 – Nov 2024*

- Built a **full-stack expense management system** to add, edit, delete, and filter daily transactions with a clean and responsive user interface.
- Backend built with **Django class-based views (CBVs)** and Django ORM following clean code, separation of concerns, and OOP best practices.
- Exposed REST APIs via **Django REST Framework** and consumed them in React.js using Axios, with client-side state and conditional rendering.
- Implemented **category-wise filtering, date-range queries**, and summary statistics (income, expenses, net balance) for actionable financial insights.

Certifications

- **Oracle Cloud Infrastructure 2025** – Certified AI Foundations Associate — *Oracle, 2025*
- **Data Structures & Algorithms with Java** — *LearnYard*
- **Python Programming** — *Infosys Springboard*

Extracurricular Activities

Vyom Society – Management Team Member — 2023 – 2025
Student Technical Society, JSS Academy of Technical Education — *Noida, India*

- Collaborated with the core team to plan and execute **departmental and institute-level technical events**, managing logistics, schedules, and participant coordination.
- Demonstrated **cross-functional teamwork, leadership, and organizational skills** while balancing active involvement alongside full-time academic responsibilities.
