SUMMARY

Final-year B.Tech Information Technology student specializing in **Java backend development** with strong foundations in Data Structures, Algorithms, and System Design. Experienced in building scalable REST APIs using **Spring Boot**, designing concurrent systems, and optimizing databases. Passionate about developing high-performance backend systems and solving real-world engineering problems.

SKILLS

Programming Language: Java
Backend Development: Spring Boot, REST APIs, Microservices
Databases: MySQL, SQL
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS
Concurrency & Systems: Multithreading, Synchronization
Tools & Platforms: Git, GitHub, IntelliJ IDEA

EXPERIENCE

Backend Developer (Freelance) | Remote

- Developed backend services using **Java & Spring Boot**
- Designed and implemented REST APIs for business logic
- Integrated authentication and optimized database performance
- Collaborated with clients to deliver scalable backend solutions

PROJECTS

Offline UPI Payment System (Without Internet) | Java | Spring Boot | System Design

- Designed an **offline-first UPI-like payment system** enabling transactions without internet connectivity
- Implemented **secure token-based transaction validation** to prevent double spending
- Built a **local transaction queue & synchronization mechanism** for eventual consistency
- Simulated **QR/NFC-based payment flow** between users
- Ensured data integrity using **hashing and encryption techniques**
- Designed system to handle **multiple offline transactions securely before settlement**

Distributed Job Queue & Background Processing System | Java | Spring Boot | Multithreading

- Built a **distributed job queue system** for asynchronous task processing (emails, payments, notifications)
- Implemented **producer-consumer architecture** using multithreading
- Designed **retry mechanism with exponential backoff** for failed jobs
- Developed **dead letter queue** for handling failed task recovery
- Improved system responsiveness by offloading heavy operations to background workers

EDUCATION

- Bachelor of Technology (Information Technology)

JSS Academy of Technical Education, Noida | 2022–2026

- (Class XII): 2021 Happy Model School - Varanasi
- (Class X): 2019 Happy Model School - Varanasi, India

KEY HIGHLIGHTS

- Strong foundation in **Data Structures & Algorithms** with practical problem-solving experience
- Proficient in **Java and Spring Boot** for building scalable REST APIs
- Good understanding of **system design fundamentals and backend architecture**
- Hands-on experience with **multithreading, concurrency, and performance optimization**
- Skilled in **MySQL, query optimization, and efficient data handling**
