CAREER OBJECTIVE

Aspiring Data Scientist with hands-on experience in machine learning, NLP, and data-driven application development, seeking to leverage analytical and problem-solving skills to build scalable, impactful AI solutions.

WORK EXPERIENCE

AI Internship| Evnek Technologies| Remote
Feb 2026-April 2026

- Engineered and integrated AI-powered features using LLM APIs (OpenAI/Claude) to enhance application intelligence and user interaction workflows
- Designed and implemented prompt engineering strategies to improve response accuracy, contextual understanding, and output consistency
- Developed scalable backend services leveraging Node.js/Python for seamless AI model integration with web applications
- Built and optimized end-to-end AI-driven modules (e.g., chatbot / recommendation system / content generator) with focus on performance and usability
- Collaborated in an Agile development environment, utilizing Git-based version control for efficient code management and feature deployment
- Improved system efficiency by optimizing API calls, reducing latency, and enhancing response handling mechanisms Participated in debugging, testing, and refining AI workflows to ensure reliability and production-readiness

Data Science Internship | Acmegrade | Remote
Feb 2024 – Apr 2024

- Analyzed real-world datasets using Python to identify patterns and trends
- Performed data cleaning and preprocessing to improve data quality
- Applied basic machine learning and statistical techniques for data-driven insights
- Created reports and visualizations for effective data interpretation

EDUCATION

B. Tech – Electronics and Communication Engineering — Expected Graduation: 2026
University Institute of Technology, RGPV, Bhopal — CGPA:7.66

Class 12 (CBSE) — 2021
Hema Higher Secondary School, Bhopal — 91%

SKILLS

Programming & Databases: Java, Python, C, HTML, CSS, SQL, Excel, Power BI

Technical Skills: Data Structures and Algorithms, OOPs, DBMS, Operating System

Data Analysis & Analytics: Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Data Validation, Trend Analysis & Reporting

Machine Learning: Supervised & Unsupervised Learning (basic understanding), Model Training & Evaluation, Feature Selection (basic), Regression & Classification (Basic understanding)

Others: Documentation, Process improvement

Tools & Libraries: Pandas, NumPy, Pygame, Matplotlib, Seaborn, Scikit-Learn,

Version Control & OS: Git, GitHub, Linux (basic commands, file system navigation, shell usage)
MS Excel (Pivot Tables, VLOOKUP/XLOOKUP, Charts)
Soft Skills: Time management, Effective Communication, Teamwork, Problem Solving, Quick Learner
IDEs: VS Code, Jupiter Notebook, Google Collab, MATLAB, MS Office, PyCharm, IntelliJ IDEA

PROJECTS

Secure Password Manager (Python)

- Developed encrypted password management system with authentication features
- Implemented hashing and encryption for secure data storage
- Designed modular and maintainable code structure

AI-Driven HRMS Platform with Intelligent Candidate Matching & Analytics

Tech Stack: Python, NLP, Scikit-learn, FastAPI, SQL, Streamlit

- Contributed to the development of a smart HRMS platform with modules like Active Jobs, Candidate Pipeline, and Analytics Dashboard.
- Designed and implemented an AI-based candidate matching system using NLP techniques (TF-IDF, embeddings, cosine similarity) to calculate AI Matching Scores between resumes and job descriptions.
- Built dynamic dashboards to track recruitment metrics, pipeline stages, and hiring insights for data-driven decision-making.
- Improved recruiter efficiency by automating candidate screening and ranking workflows.
- Worked on backend logic for real-time data updates and scalable API integration.
- Enhanced system usability by making previously static components fully dynamic and data-driven.

EXTRA-CURRICULAR ACTIVITIES

- Cleared the First Stage of NTSE in 2018.
- Participated in online coding competitions on platforms like Leetcode or coding ninja.
- Attended **webinars/workshops** on Data Science, Analytics, and AI
