NISHANT SINGH

+91 9918721072 iam.nishantsingh7081@gmail.com LinkedIn Noida, India

Summary

B.Tech Computer Science Engineer (2026) specialising in backend-heavy full stack development with Java and Spring Boot. Built 3 end-to-end projects covering e-commerce, project management, and healthcare domains. Delivered 15+ REST APIs during a software engineering internship at a product-based AI startup in an Agile environment.

Skills

Languages: Java (primary), JavaScript, SQL
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices
Frontend: React.js, HTML5, CSS3, Bootstrap
Databases: MySQL, MongoDB
AI Integration: LLM API Integration (Gemini/OpenAI), Prompt Engineering
Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman
Core & Soft Skills: OOP, Collections, Exception Handling, DSA, Problem Solving, Communication, Team Collaboration

Experience

Software Engineering Intern Aug. 2025 – Oct. 2025
DocRack AI (Orbicle Labs) *Remote*

- Developed and tested REST APIs in Java/Spring Boot for internal product modules; optimised slow-running MySQL queries by rewriting with proper JOINs, improving data retrieval performance for the client data module.
- Built React frontend components integrated with Spring Boot APIs for end-to-end data flow on core product features; collaborated in an Agile team with daily standups, sprint planning, and Git-based version control.

ShopNow — E-Commerce Platform | *Java, Spring Boot, React.js, MySQL* | GitHub 2025

- Built a full stack e-commerce platform with separate admin and customer roles with JWT-based authentication and Spring Security; developed 15+ REST APIs following MVC architecture for product listing, cart management, and order placement.
- Designed normalised MySQL schema from scratch with proper foreign key constraints; implemented dynamic routing in React connecting all frontend views to backend APIs for a fully functional end-to-end experience.

TaskFlow — Project Management Tool | *Spring Boot, React.js, MongoDB* | GitHub 2025

- Built a Trello-style project management tool for creating projects, assigning tasks, and tracking deadlines; chose MongoDB over relational DB to avoid costly schema migrations.
- Implemented drag-and-drop Kanban board in React with To Do / In Progress / Done columns; added email reminders, PDF export, and Google Gemini API integration to auto-generate task descriptions.

BloodPoint — Blood Donor & Request Management | *Node.js, Express.js, JWT, bcryptjs* | GitHub 2026

- Built a full stack blood donation platform connecting donors, requesters, and hospitals with role-based access and real-time notification alerts; designed a custom JSON-based database engine supporting full CRUD, WHERE filters, GROUP BY analytics, and JOIN-like enrichment across 8 entities.
- Implemented secure authentication using bcrypt and JWT; built donor search filterable by blood type, city, and availability with healthcare workflows covering blood inventory tracking, donation history, and urgency-based request prioritisation.

Education

J.S.S. Academy of Technical Education 2022 – 2026
Bachelor of Technology (B.Tech) – Computer Science Engineering (Data Science) *Noida*

Certifications

- Internship Completion Certificate Orbicle Labs (DocRack AI)
- Deloitte Australia Technology Virtual Job Simulation (Forage)
