# AYUSHI

Ghaziabad, Uttar Pradesh
+91 8384898652 | Ayushisain301@gmail.com | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate with practical experience in **Full Stack Development, MERN Stack, AI/ML, and scalable SaaS platforms**. Skilled in building production-ready web applications, REST APIs, authentication systems, AI-powered tools, and responsive dashboards. Experienced in cloud deployment, database management, API integrations, and machine learning workflows. Passionate about solving real-world problems through modern technologies and continuously learning advanced software engineering practices.

## EDUCATION

**Bachelor of Technology in Computer Science and Engineering** 2022 – 2026
Raj Kumar Goel Institute of Technology (RKGIT), Ghaziabad **CGPA: 7.4**
**Senior Secondary Education** 2022
Aum Sun Public School

## TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL, HTML5, CSS3
- **Frontend Technologies:** React.js, Bootstrap, Tailwind CSS, Responsive UI Design, EJS, React Hooks
- **Backend Technologies:** Node.js, Express.js, Flask, REST APIs, Authentication Systems
- **Databases & Cloud Platforms:** MongoDB, MySQL, Firebase, Supabase, Firestore, Cloudinary, Oracle Cloud
- **AI / ML & Data Science:** Machine Learning, NLP, Data Analysis, Scikit-learn, TensorFlow (Basics), Pandas, NumPy, Streamlit
- **Authentication & Security:** JWT Authentication, RBAC, Google OAuth, Secure API Integration
- **Developer Tools:** Git, GitHub, Docker, Postman, Netlify, Render, VS Code, k6, Locust.
- **AI Tools:** Claude,Chatgpt,Thunderclient,Perplexity,Gemini,Blackbox
- **Core Concepts:** Scalable Systems, API Integration, Deployment Optimization, OOPs, DBMS, Operating Systems,System Design (Basics),Agile Methodology,Unit Testing,Problem Solving,Software Development Lifecycle (SDLC)

## EXPERIENCE

### AI/ML Intern **May 2026 – Present**
**Emerging India Analytics, Noida**

- Developed and deployed AI-powered full-stack applications using **Flask, Node.js, Firebase, Supabase, MySQL, HTML, CSS, and JavaScript**.
- Built and enhanced **ResumeForge** and **ResumeElite** platforms with advanced features including **JWT authentication, Google OAuth, RBAC, AI-assisted resume generation, and responsive dashboards**.
- Integrated **REST APIs, Supabase Authentication, Firestore Database, and OpenRouter AI APIs** for scalable backend services and real-time data handling.
- Implemented AI-powered content enhancement systems and browser-based voice assistant functionality using **SpeechRecognition APIs**.
- Improved deployment workflows using **Netlify, Render, GitHub, and environment variable management**, resolving API routing and production deployment issues.
- Conducted load testing and scalability analysis using **k6 and Locust**, identifying bottlenecks and suggesting caching, autoscaling, and queue-based processing strategies.
- Collaborated in agile development workflows involving debugging, authentication flows, backend integration, responsive UI optimization, and scalable SaaS architecture planning.
- Improved frontend rendering and API response handling, enhancing overall application reliability and user experience.
- Assisted in implementing reusable UI components and modular backend architecture for better maintainability and scalability.

### Web and App Developer Intern **July 2025 – Oct 2025**
**QMANSYS Infosolutions LLP**

- Designed and developed an AI-based weather prediction system using REST APIs, improving data retrieval efficiency by **15%**.
- Integrated third-party APIs to deliver real-time weather insights for **100+ users**, improving system reliability and responsiveness.
- Reduced application bugs by **12%** through systematic debugging, testing, and backend optimization.
- Built scalable and maintainable API endpoints while collaborating in an agile development environment.
- Contributed to sprint planning, code reviews, deployment testing, and feature enhancement workflows.
- Worked closely with developers to optimize frontend responsiveness and backend performance.

## PROJECTS

**WANDERLUST — Full Stack Travel Platform** Live | GitHub

- Developed a full-stack travel listing platform featuring **JWT-based authentication** and RESTful CRUD APIs for managing 50+ property listings.
- Implemented secure login/signup systems and authorization middleware for protected user operations.
- Improved application performance by **25%** through optimized Cloudinary image management and frontend asset optimization.
- Designed responsive UI components ensuring seamless user experience across desktop and mobile devices.
- Integrated MongoDB database operations and scalable backend routing for efficient data handling.

**STOCK TRADING PLATFORM — MERN Dashboard** Live | GitHub

- Engineered a secure MERN-stack trading dashboard with protected routes and custom Express middleware for authentication and data security.
- Enhanced frontend performance by **20%** using **React Hooks (useMemo, useCallback)** to reduce unnecessary re-renders.
- Developed REST APIs and integrated MongoDB for scalable and efficient real-time data handling.
- Built responsive dashboard interfaces with reusable React components and optimized state management.
- Implemented modular backend architecture improving maintainability and future scalability.

**CROP RECOMMENDATION SYSTEM — ML Based Prediction App** Live | GitHub

- Built an interactive **Streamlit web application** that predicts suitable crops based on user inputs using supervised machine learning algorithms.
- Achieved approximately **98% prediction accuracy** through preprocessing, feature engineering, and model optimization techniques.
- Utilized Python libraries including **Pandas, NumPy, and Scikit-learn** for data preprocessing and predictive model training.
- Designed an intuitive and responsive interface allowing farmers to easily input environmental parameters.
- Improved model reliability through dataset cleaning, normalization, and validation techniques.

**AI RESUME BUILDER — SaaS Resume Platform**

- Developed an AI-powered resume builder platform supporting dynamic resume generation and customizable templates.
- Integrated **JWT Authentication, Google OAuth, Supabase, and OpenRouter APIs** for secure and scalable operations.
- Built responsive dashboards for students, teachers, and administrators with role-based access control.
- Implemented AI-assisted resume content enhancement workflows improving user productivity and resume quality.
- Optimized frontend rendering and reusable React-based components for better performance and maintainability.

**PORTFOLIO WEBSITE — Personal Developer Portfolio** Live | GitHub

- Designed and developed a responsive developer portfolio using **React.js** with smooth navigation and interactive UI components.
- Optimized cross-browser compatibility and improved page performance metrics including Largest Contentful Paint (LCP).
- Integrated project showcases, GitHub repositories, and deployment links to improve recruiter accessibility.
- Built reusable frontend components and responsive layouts ensuring scalability and maintainability.

## CERTIFICATIONS & ACHIEVEMENTS

- **Vice President — Nebula Club:** Led technical initiatives, mentorship activities, and coordinated technical events for CSE-AIML students.
- **Full Stack MERN Certification:** Completed 200+ hours of practical full-stack development training focused on React.js, Node.js, MongoDB, and deployment workflows.
- **Event Leadership:** Organized “Hack the Prompt” and “Tech Expo 3.0” while managing technical operations and student coordination.
- **Research Publication:** Published research paper on *Machine Learning-Driven Congestion Control in Computer Networks*.
- **Hackathon Participation:** Participated in multiple coding competitions, technical workshops, and innovation-focused events.
- **Robo Soccer Finalist:** Finalist in inter-college Robo Soccer competition demonstrating teamwork and problem-solving abilities.
