OBJECTIVE

I am a Data Science and **Machine Learning** (ML) fresher with a strong interest in **NLP** and **Deep Learning**, recently having built a Language Detection & Translation tool and a Movie Recommendation System. I have hands-on experience in **Python**, **Machine Learning**, **NLP**, and **Statistical Analysis**, with familiarity in **TensorFlow**, **Microsoft Azure** AI services, and data visualization tools like **Power BI**. I am a proactive team player eager to contribute to real-world data science and ML solutions in a professional team environment.

EDUCATION

Bachelor of Technology in CSE (AI & ML) — IMS Engineering College, Ghaziabad *Aug 2023 – Sep 2027*

SKILLS

Technical Skills: Machine Learning, **Deep Learning**, **NLP**, **Statistical Analysis**, Data Analysis & Cleaning, EDA, Data Visualization

Tools & Libraries: TensorFlow, **Pandas**, **NumPy**, **Matplotlib**, **Seaborn**, **Scikit-learn**, Jupyter Notebook, Excel, Kaggle, **Power BI**, **Streamlit**

Cloud & ETL: Microsoft Azure AI/NLP Services, ETL Pipelines, **REST API** Integration, **Streamlit Deployment**

Languages: Python, SQL

PROJECTS

1. Movie Recommendation System *Feb 2026 – March 2026*

Tech Stack: Python, NLP (TF-IDF), Scikit-learn, Pandas, Streamlit, TMDB API

- Developed a **content-based** movie recommendation system using **TF-IDF vectorization** and **cosine similarity** to recommend similar movies based on textual metadata.
- Built an interactive web application using **Streamlit** to allow users to search movies and receive personalized recommendations.
- Integrated **TMDB API** to dynamically fetch movie posters, ratings, and release information; implemented trending movies, adjustable recommendation count, movie overview, and trailer links.

2. Language Detection & Translation *March 2026*

Tech Stack: Python, Scikit-learn, NLP (TF-IDF, Character N-grams), FastText, Helsinki-NLP, Streamlit

- Built an **end-to-end ML pipeline** for language detection across **22 languages** using **TF-IDF vectorization** and **Naive Bayes**, achieving **97.5% accuracy**.
- Implemented a **hybrid detection** system (custom NB model + **FastText** backup) supporting **170+ languages** beyond training data.
- Integrated **Helsinki-NLP MarianMT transformer models** for multilingual translation with a 3-level fallback mechanism for maximum language pair coverage.
