Professional Summary

Enthusiastic and detail-oriented Electronics and Communication Engineering graduate with a strong foundation in circuit design, microcontrollers, embedded systems, and signal processing. Passionate about developing innovative engineering solutions and seeking an entry-level position where technical knowledge, analytical abilities, and problem-solving skills can contribute to organizational success.

Education

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering
Government Engineering College, Aurangabad, Bihar 2021 – 2025

Technical Skills

- **Programming Languages:** C, C++, Python
- **Embedded Systems:** Arduino, Microcontrollers
- **Design Tools:** PCB Design, Proteus, MATLAB
- **Data Analysis:** Excel, PowerPoint
- **Technologies:** IoT, Wireless Sensor Networks (WSN), Machine Learning

Academic Projects

Weather Monitoring and Prediction System

- Developed a real-time weather monitoring system using environmental sensors for temperature, humidity, and wind-speed measurement.
- Collected and displayed weather data continuously with minimal latency.
- Integrated predictive analytics to forecast weather parameters based on historical and real-time data.

Smart Agriculture IoT Monitoring System

- Designed an IoT-enabled smart agriculture system using Arduino/Raspberry Pi and wireless sensor networks.
- Integrated soil moisture, NPK, and DHT11 sensors for real-time monitoring of crop and soil conditions.
- Implemented cloud connectivity using Wi-Fi/LoRaWAN for remote access and monitoring.
- Developed an automated irrigation mechanism to optimize water usage and improve crop productivity.

Certifications

- Python Programming
- PCB Design
- Machine Learning Fundamentals

Achievements

- Developed an embedded weather monitoring system that recorded atmospheric data with zero noticeable lag.
- Achieved over 92% prediction accuracy for temperature and rainfall forecasting using predictive analytics.
- Engineered an IoT-based smart agriculture framework capable of transmitting soil telemetry over a 2 km range using LoRaWAN technology.
- Reduced water consumption by approximately 40% through an automated irrigation algorithm.

Strengths

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Quick Learner
- Team Collaboration

Languages

- Hindi
- English
