Summary

Aspiring Data Analyst with hands-on experience in transforming raw data into actionable insights using Python, SQL, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), and building interactive dashboards to support data-driven decision-making. Experienced in developing predictive models and analyzing large datasets to identify trends and performance patterns. Passionate about leveraging analytical techniques and visualization tools to deliver significant business insights and improve operational efficiency.

Skills

Programming Languages	Python, SQL, C, HTML/CSS, MySQL
Libraries & Frameworks	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Data Visualization Tools	Power BI, Advanced MS Excel
Tools & Platforms	VS Code, Jupyter, Streamlit, Google Colab, GitHub
Analytical Abilities	Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Predictive Modeling
Core Concepts	OOP, Data Structures & Algorithms, DBMS, Computer Organization (COA)

Experience

Data Analytics Intern, DocRack AI – Mumbai Jul. 2025 – Oct. 2025

- Performed large-scale data analysis using Python and SQL, extracting actionable insights that supported faster and more informed strategic decision-making.
- Designed and automated Power BI dashboards and KPI reports, reducing manual analytics workload by 35% while enabling stakeholders to monitor real-time performance metrics.
- Engineered an automated document-processing solution with 98.77% accuracy, streamlining document workflows and minimizing manual verification effort.

Projects

Sales & Profit Performance Dashboard

Analyzed Adventure Works sales dataset to identify key trends in revenue, profit margins, and regional performance using Power BI,reducing manual analysis time by 35%

Developed interactive dashboards with KPI metrics including Sales Growth %, Profit Margin %, and regional sales contribution to enable data-driven insights.

Tech Stack: Power BI, DAX, Power Query, Data Modeling *Jan. 2026 – Feb. 2026*

Developed a content-based movie recommendation system using Python and Pandas, incorporating data preprocessing, feature extraction, and cosine similarity analysis.
Deployed an interactive Streamlit web app enabling user-driven recommendations with real-time filtering and dynamic results display.
Tech Stack: Python, Pandas, Streamlit *Mar. 2025 – Apr. 2025*

Cleaned and explored a Telco dataset with 5,000+ entries using SQL and Python; identified key churn-drivers through structured funnel and cohort analysis.
Designed and optimized an XGBoost classification model achieving 97.8% accuracy through hyperparameter tuning and feature engineering.
Tech Stack: Python, SQL, Pandas, Scikit-learn, Power BI, Seaborn *Nov. 2024 – Dec. 2024*

Designed a multi-page BI dashboard for comprehensive sales, profit, and regional performance analysis, enabling drill-down views by product category and time period.
Created DAX measures for Year-over-Year (YoY) growth and KPI tracking; performed ETL and data transformation using Power Query to ensure clean, analysis-ready data.
Tech Stack: Power BI *Nov. 2025 – Dec. 2025*

Education

JSS Academy of Technical Education, Noida Aug. 2022 – Jun. 2026

Bachelor of Technology (B.Tech) – Computer Science and Engineering with Data Science
Relevant Coursework: Data Structures, DBMS, Computer Networks, Operating Systems, Software Engineering, Introduction to AI

SR Public School 2021

Class XII (PCM)

Sainik School Satara 2019

Class X
