Projects

E-Commerce Website **GitHub** Feb 2024
Frontend Project *HTML, CSS, JavaScript*

- Designed a responsive online shopping interface with product UI components and category filtering.
- Ensured mobile-friendly design and smooth cross-device compatibility.

AI-Powered Code Analyzer **GitHub** Jan 2024
Full-Stack Project *React.js, Node.js, Express.js, Gemini API*

- Engineered a full-stack AI code analyzer using React, Node.js, and Express.js with real-time code review and error detection.
- Integrated Gemini API for automated code analysis, performance insights, and best-practice recommendations.
- Implemented syntax highlighting (Prism.js), RESTful API workflows, and optimized backend processing for accurate analysis.

Real-Time Chat Application **GitHub** July 2025
Full-Stack Project *React.js, Node.js, Express.js, Socket.io, MongoDB*

- Developed a full-stack real-time chat application with one-to-one messaging using React, Node.js, Express.js, and Socket.io.
- Implemented JWT-based authentication, online/offline status tracking, and MongoDB data models for fast message retrieval.
- Added profile editing with image upload and real-time image sharing for enhanced user experience.
