Professional Summary

Aspiring Data Analyst with strong skills in SQL, Excel, and data visualization. Experienced in analyzing datasets, building dashboards, and extracting actionable insights to support business decisions. Proficient in data cleaning, KPI tracking, and reporting. Passionate about transforming raw data into meaningful insights.

Technical Skills

Data Analysis:
SQL (Joins, Aggregations, Subqueries), Excel (Pivot Tables, VLOOKUP, Data Cleaning, Dashboards)

Data Visualization:
Power BI (Dashboards, DAX basics, Data Modeling,Visualization)

Core Concepts:
Data Cleaning, Data Analysis, Dashboard Design, Basic Statistics

Projects

Sales Data Analysis Dashboard | Excel

- Analyzed 12 months of sales data (5,000+ records) to identify revenue trends and top-performing products
- Built an interactive dashboard using Pivot Tables and charts
- Tracked KPIs such as revenue growth, profit margin, and sales performance
- Reduced manual reporting effort by 50% through automation

Customer Churn Analysis | SQL

- Wrote complex SQL queries using JOIN, GROUP BY, and CASE statements
- Identified customer churn patterns and high-risk segments
- Generated insights to improve customer retention strategies

---

Business Insights Dashboard | Power BI

- Built an interactive dashboard with filters and slicers for dynamic analysis
- Visualized key metrics like revenue, customer trends, and performance
- Delivered insights for data-driven decision-making

Experience

Backend Intern (Training Program) | 1stStop July 2025 – Sep 2025

- Worked with SQL for data extraction and query optimization
- Handled structured datasets and backend data operations
- Gained experience with APIs and database integration

Education

B.Tech, Computer Science & Engineering
Gurukul Kangri (Deemed to be University) Haridwar | 2022 – 2026 | GPA: 7.0/10

Additional Information

- Strong analytical and problem-solving skills
- Effective communication and data storytelling ability
