OBJECTIVE

Aspiring Data Analyst with knowledge of Python, SQL, Excel, and data visualization. Seeking an opportunity to apply problem—solving skills and turn raw data into meaningful insights to support business growth and decision making.

EDUCATION

- Pursuing Bachelor of Computer Application(BCA) from C.C.S. University (2024-2027)
- 10th pass out from CBSE board (2022)
- 12th pass out form NIOS (2024)
- Data Analytics course from Aptech Learning (2025-2026)

PROJECTS

- Quiz Game using Python
  Developed an interactive quiz using python with multiple-choice question, score tracking, and user input handling to improve logical and programming skills.

- Weight Converter using Python
  Developed a weight converter application using python and if-elif conditions to convert units like kilograms, grams, and pound based on user-input.

- Dashboard project using Power BI
  Created an interactive dashboard in Microsoft Power BI for data analysis and visualization using charts, graphs, filters, and reports to generate meaningful business insights.

TECHNICAL KNOWLEDGE

- Languages: Python.
- Frontend: HTML,CSS, Bootstrap.
- Database: SQL, Excel
- Data visualization : Microsoft Power BI
- Developer Tools: VS Code, Google collab, Kaggle.
