PROJECTS

- **Project 1 Damruu Stock CRM – Inventory Management System**: Built a stock inventory management CRM to manage materials, vendors, inventory, GRNs, quality checks, and dispatch workflows. Developed responsive dashboards and CRUD modules using Laravel backend and Tailwind-based frontend.
- **Project 2 PRB – Corporate Business Website**: Designed and developed a responsive corporate website using Laravel for both frontend and backend. Implemented dynamic pages, clean UI, and reusable components with Tailwind CSS.
- **Project 3 Rock, Paper, Scissor Game using JavaScript**: The game will consist of rounds of rock-paper-scissors. A player will need to win if it gets the majority of winning chances(i.e the greatest number). The game will result in a draw if no player wins the majority.
- **Project 4 Random Color Generator using React.js**: In this project, there are three buttons, one is for RGB Color, another is for HEX Color and third button to generate these colors. Random colors are generated by clicking on specific button.
- **Project 5 Quiz App using JavaScript**: In this project, random questions are generated with four options and on the basis of answers selected a score is obtained.
- **Project 6 To - do's List Using javascript**: It is a web Based Application which we generally used to maintain our day to day tasks or list of everything that we have to do. we can add or delete tasks anytime. The four major tasks that we can perform are: 1) Add tasks 2) Clear list 3) Update list 4) Delete tasks
