SUJAY KUMAR

7301590242 — sujay7301590@gmail.com
GitHub — Portfolio — LeetCode

Summary

Frontend-focused Full Stack Developer skilled in React.js, JavaScript, Node.js, Express.js, and MongoDB, with experience building production-ready SaaS applications, analytics platforms, and privacy-first web tools. Developed scalable applications handling 50,000+ requests and integrated AI services, authentication systems, REST APIs, and responsive user interfaces. Experienced in leveraging AI-assisted engineering workflows to accelerate development, debugging, and optimization.

Technical Skills

Languages: Java, JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js, MongoDB

Core Concepts: Data Structures & Algorithms, REST APIs, Authentication, Responsive Design

Developer Tools: Git, GitHub, Postman

Deployment & Cloud: Vercel, Render, Railway, Netlify

AI-Assisted Engineering: Antigravity, Claude Code, Codex

Projects

GeoSharp – GEO & SEO Analytics Platform Live Demo

- Developed a full-stack SEO and GEO auditing platform with 27+ website analysis checks.
- Implemented crawling, sitemap parsing, schema validation, and technical SEO auditing features.
- Integrated OpenAI and Gemini APIs for AI-powered optimization recommendations.
- Built authentication, scan history tracking, and analytics reporting functionality.
- Continuously improving platform capabilities, including subscription workflows and advanced reporting features.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, OpenAI API, Gemini API.

SafePDF – Privacy-First PDF Suite Live

- Built a fully client-side PDF platform ensuring complete document privacy without server uploads.
- Developed 12+ PDF utilities including merge, protect, compress, and optimization tools.
- Handled 50,000+ requests within the first week using scalable Vercel Edge infrastructure.
- Improved performance by eliminating backend processing through browser-based computation.
- Leveraged AI-assisted engineering tools to accelerate debugging, optimization, and feature delivery.
- **Tech Stack:** React.js, Tailwind CSS, Vercel Edge, PDF Processing Libraries.

NeoShop – Voice-Enabled E-Commerce Platform GitHub

- Developed a responsive e-commerce platform with product browsing, cart management, and checkout workflows.
- Built scalable backend services using Node.js, Express.js, and MongoDB for authentication and product management.
- Integrated secure payment processing and transaction handling.
- Designed voice-enabled shopping features to improve accessibility and user experience.
- Implemented REST API integration for seamless frontend and backend communication.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB.

Achievements

- Solved 150+ Data Structures and Algorithms problems across coding platforms including GeeksforGeeks and LeetCode.
- Built and deployed 3+ production-ready web applications using modern web technologies.
- Developed scalable applications handling 50,000+ requests with focus on performance and user experience.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Raj Kumar Goel Institute of Technology (AKTU), Ghaziabad, Uttar Pradesh

Expected Graduation: 2026

Languages

English (Fluent) Hindi (Native)
