Profile Summary

Data Analyst with 2.5+ years of experience in data cleaning, validation, automation, and data analysis. Skilled in Python, SQL, Pandas, NumPy, Excel, and Power BI. Experienced in transforming raw and annotated data into analysis-ready datasets, performing data quality checks, building dashboards, and generating insights to support business decision-making.

Technical Skills

Programming & Scripting :
Python (Data Cleaning, Automation, Pandas, NumPy), Web Scraping (BeautifulSoup)
Querying & Databases :
SQL (Joins, Subqueries, Aggregations)
Data Analysis & Visualization :
Power BI (DAX, KPIs, Dashboards)
Excel (Pivot Tables, VLOOKUP/XLOOKUP, Data Validation)
Data Engineering Concepts:
Data Warehousing (Basics), ETL Workflows, Data Pipeline)
Others: Strong Communication, Presentation Skills, Analytical Skills, Ownership & Accountability
Data Operations & Analytics :
Data Cleaning & Transformation
Data Quality Checks & Validation
Data Analysis
Trend Analysis
Reporting & Dashboarding

Experience

Droisys India Private Limited **Feb 2023 – Current**
Data Analyst *Noida, UP*

- Managed end-to-end data operations, leading the team, ensuring data accuracy and consistency through structured reviews, and overseeing the complete data lifecycle from collection to final delivery for ML and analytics teams.
- Built and used Python-based web scraping tools (BeautifulSoup) to collect, transform, and structure data, reducing manual effort by 60% and supporting analytics workflows.
- Transformed unstructured data into analysis-ready formats using Python and SQL, improving data processing efficiency by 35%.
- Analyzed datasets to identify patterns, trends, and support data-driven insights for reporting and dashboards.
- Supported reporting and analysis use cases by preparing clean, validated datasets for dashboards, KPIs, and performance tracking.
- Worked with structured data pipelines and followed data governance and compliance practices to ensure data integrity and accuracy.

Projects

Sales Forecasting and KPI Dashboard – Power BI

- Built an interactive Power BI dashboard from Excel data with DAX-based KPIs and drill-down visuals.
- Applied time-series forecasting to predict 15-day sales and delivered key business insights.
- Cleaned and transformed raw Excel sales data for accurate reporting and improved data quality.

A360 | *Python, YOLO, ML*

- Supported ML workflows by preparing, validating, and analyzing image datasets, contributing to a 20% improvement in model performance.
- Curated image datasets and applied preprocessing techniques to improve data consistency and quality.

Automation Script

- Automated Python scripts to correct wrong annotations by renaming files and organizing them across multiple folders.
- Added automated validation checks to detect bad images and duplicate bounding boxes, improving dataset accuracy and reliability.
- Utilized os, shutil, and argparse modules.

Education

Hi-Tech Institute Of Engineering And Technology **2021 – May 2023**
Master of Computer Applications *Ghaziabad, Uttar Pradesh*
Hi-Tech Institute Of Engineering And Technology **2018 – May 2021**
Bachelor of Computer Applications *Ghaziabad, Uttar Pradesh*

Achievements and Awards

- **Annual Excellence Award** – Awarded for end-to-end ownership of ML dataset delivery, strong commitment to timelines, and ensuring high-quality data that contributed to improved model reliability.
- **Star Performer of the Quarter** – Recognized for consistent data quality ownership, meeting delivery commitments, and maintaining high standards in dataset preparation and validation.
