ANIKET KUMAR

Noida, India | kaniket9910@gmail.com | +91-9560518118

Target Roles: Data Analyst | Associate System Engineer | Entry Level Data Operations

PROFESSIONAL SUMMARY

Detail-oriented Developer and Data Analyst with hands-on experience in data processing, quality assurance, and full-stack application development. Proficient in Python, SQL, and REST APIs with a strong foundation in data science, big data analytics, and web-based research. Experienced in Agile workflows, data documentation, and building data pipelines. Quick learner with growing knowledge of financial data, alternative assets, and private markets concepts. Certified in Python Programming and Cybersecurity. Seeking to contribute to data quality, process optimization, and research-driven data management within a global team.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL (MySQL), Java, C++, Node.js, C

Data & Analytics Tools: Pandas, scikit-learn, yfinance, data visualization, big data analytics, data quality assurance

Microsoft Tools: Excel, SharePoint, Office 365, Microsoft Copilot (learning)

Web & Databases: HTML, CSS, REST APIs, MySQL, Flask

Methodologies: Agile/Scrum, SDLC, Data Documentation, Audit Trail Maintenance, Web-based Research, Process Re-engineering

Domains of Interest: Financial Data, Private Markets, Alternative Assets, Cloud Computing, Cybersecurity, Blockchain

EXPERIENCE

Project Engineer (Academic Role) | Harlal Institute of Management and Technology *Feb 2026 – May 2026*

- Acquired, processed, and maintained structured and unstructured data across 3+ group projects, ensuring data accuracy and completeness.
- Conducted web-based research to collect and interpret company information, filings, and key data points for academic deliverables.
- Maintained clear documentation and audit trails for project decisions, following Agile sprint-based workflows.
- Collaborated with cross-functional teams to perform data quality reviews and debugging sessions, improving system performance and output reliability.
- Implemented applications using Java, C, C++, and HTML, contributing to workflow optimization and process re-engineering initiatives.

Freelancer – Crypto & Blockchain Data Projects | Independent *Jan 2024 – Present*

- Conducted in-depth research and data validation as a beta tester for prominent blockchain projects including World, OpenSea, Taiko, and SUI.
- Analyzed and interpreted structured/unstructured public data related to firm information, deals, and valuations within the blockchain/alternative assets space.
- Managed community engagement and documentation across Discord channels, maintaining audit trails for research insights and project feedback.
- Developed subject-matter expertise in blockchain and digital assets — an emerging segment of alternative investments — to support data product quality.

PROJECTS

Stock Price Prediction Application | Python | Flask | Pandas | scikit-learn | yfinance *2026*

- Built a full-stack data application that acquires real-time financial market data using the yfinance library, performing data extraction, manipulation, and quality validation via Pandas.
- Deployed a machine learning predictive model using scikit-learn to forecast stock prices, demonstrating understanding of financial data and market statistics.

- Maintained clear data pipelines with structured inputs/outputs — directly applicable to financial data management and database update workflows.

Data Analysis Tool | Python | Big Data Analytics | Data Visualization *2026*

- Developed a Python-based data analysis tool focused on big data analytics, data quality assurance, and structured data visualization.
- Applied data science techniques to interpret large datasets, generate statistical analysis, and present key financial statistics and trends to stakeholders.
- Documented methodology and findings clearly, ensuring research decisions were traceable and auditable.

Online Examination System | Python | HTML | CSS | MySQL (SQL) *2024*

- Built a database-driven web application using Python and MySQL (SQL), demonstrating proficiency in data management, database updates, and structured query operations.
- Implemented REST APIs for seamless data interaction, enhancing system integration and user experience.

Web Application Development | Java | Node.js | REST APIs *2023*

- Developed a full-stack web application using Java and Node.js with REST API integration for data acquisition and interaction.
- Collaborated within an Agile team for sprint-based delivery, contributing to process documentation and code quality reviews.

EDUCATION

Master of Computer Applications (MCA) | Harlal Institute of Management and Technology (HIMT), Greater Noida *Aug 2024 – Present*

No Active Backlogs | Focus: Data Science, Cloud Computing, AI, Cybersecurity

Bachelor of Computer Applications (BCA) | Harlal Institute of Management and Technology (HIMT), Greater Noida *Jul 2021 – Jul 2024*

Key projects in Java, C, C++; active participant in technical clubs and coding contests.

CERTIFICATIONS & ADDITIONAL INFORMATION

- Python Programming Certificate — validated proficiency in data processing, scripting, and analytics
- Cyber Security Certificate — foundational knowledge of data security and compliance
- Languages: English (Professional), Hindi (Native)
- Awards: Best Goalkeeper Award (Football) — demonstrates teamwork and performance under pressure
