Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.E.	Institute of Engineering & Technology, Agra	8.01	2021-2025
Senior Secondary	CBSE Board	81.8%	2019
Secondary	CBSE Board	10.0	2017

Summary

Aspiring Software Engineer with a strong Computer Science foundation and experience building scalable, user-centric web applications. Proficient in Java, JavaScript, and full-stack development, with a focus on data structures and algorithms, and backend systems. Skilled in building RESTful APIs and database-driven applications. Passionate about solving real-world problems, optimizing performance, and delivering scalable backend solutions.

Experience

- **AI Intern** *Dec 2025 – Mar 2026*
  Infosys Springboard Remote
  – Developed and integrated AI-powered features into web applications, enhancing functionality and user experience.
  – Processed and analyzed data to improve model efficiency and overall system performance.
  – Designed and implemented RESTful APIs for efficient data exchange and system integration.
  – Collaborated with cross-functional teams to build scalable and high-performance solutions

Projects

- **Crop Recommendation System** *Jan 2026*
  Website Github
  – Engineered a machine learning–based crop recommendation system using Python to predict the top three suitable crops based on soil and climatic data.
  – Applied data preprocessing, feature engineering, and model training to enhance prediction accuracy and system performance.
  – Delivered actionable insights through a user-oriented solution to support data-driven agricultural decisions.
- **Farmer's Marketplace** *March 2025*
  Major Project Github
  – Built a full-stack farmer-to-buyer platform, reducing inefficiencies in traditional marketplaces.
  – Introduced user-centric features including product listings and seller profiles to enhance user experience.
  – Implemented RESTful APIs and backend logic using Node.js and Express.js, with MongoDB for efficient data handling.
  – Ensured accessibility and seamless user interaction across diverse user groups.

Skills

- **Programming Languages**: Java, C, JavaScript, SQL, Python
- **Tools/Frameworks**: Git, GitHub, Node.js, Express.js, React.js, MongoDB
- **Developer Tools**: VS Code
- **Operating Systems**: Windows, Linux
- **Non-Technical**: Communication, Team Collaboration, Adaptability, Quick Learning

Key Coursework

- **Core Computer Science**: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering
- **Systems**: Operating Systems, Computer Networks, Database Management Systems
- **Artificial Intelligence**: Artificial Intelligence, Machine Learning, Probability, and Statistics

Achievements/Certificates

- **NPTEL**, Programming in Java
- **Infosys Springboard**, Introduction to Artificial Intelligence
- **5 Star In Java**, on HackerRank
- **GeekStreak Challenge - GFG**, Earned a GFG Voucher for completing the coding Streak Challenge

Extracurriculars

- **Pragati: Path to Future - Cohort 3 Participant**, Infosys Springboard
- **Lead Content Writer: To-Let Globe**, Created user-focused content and improved platform engagement.
