PROJECTS

PRACTICE PROJECTS

1. Alarm using python

   A Python-based alarm clock that lets you set alarms in the format HH:MM:SS AM/PM. When the set time is reached, the program notifies you with a voice alert using the pyttsx3 text-to-speech engine.

2. YouTube video downloader

   This is a YouTube Video Downloader built with Python using the pytube library. It allows you to quickly download YouTube videos in their highest resolution by just providing the video URL.

3. To do list

   Developed a To-Do List application using Python to add, update, and delete daily tasks efficiently. Implemented file handling to save and retrieve tasks persistently between sessions. Python functions and loops for dynamic task management and user interaction through the console.
