PROFILE SUMMARY

Business Analyst & Project Coordinator with 3.5+ years of experience delivering enterprise software solutions across Healthcare, E-commerce, and SaaS domains. Proven expertise in requirements gathering, stakeholder management, Agile delivery, sprint planning, UAT, KPI tracking, release management, and cross-functional team coordination. Contributed to products serving 1,000,000+ users, managed 300+ Jira work items, participated in 35+ Agile sprints, and supported 50+ production releases. Currently pursuing M.Sc. in Data Science with a strong foundation in data analytics, process optimization, and technology consulting.

EDUCATION

Naraya Junior College, Hyderabad, India	2015 – 2017
XI-XII	76%
SRM Institute of Science and Technology, Chennai, India	2017 – 2021
Bachelor of Technology (IT)	65%
Amity University, Noida, India	2025 – 2027
M.Sc. Data Science	80%

SKILLS & PROFICIENCIES

Business Analysis & Consulting
Requirements Gathering, Stakeholder Management, Business Process Analysis, Gap Analysis, Root Cause Analysis, Impact Analysis, Requirement Elicitation, Functional Specifications, BRD (Business Requirements Document), FRD (Functional Requirements Document), Use Cases, User Stories, Acceptance Criteria, Process Mapping, UAT, KPI Tracking, Risk Management, Change Management, Client Relationship Management, Solution Design

Project & Delivery Management
Agile, Scrum, SDLC, Sprint Planning, Sprint Reviews, Backlog Management, Release Management, Jira, Confluence, Defect Tracking, Project Coordination, Cross-Functional Collaboration, Resource Planning, Dependency Management, Issue Management, Delivery Tracking, Project Governance, Stakeholder Communication

Data Analytics & Reporting
SQL, Python, Data Analysis, Statistics, Power BI, Tableau, Advanced Excel, Data Visualization, ETL Pipelines, Dashboard Development, Business Reporting, KPI Dashboards, Data Interpretation, Trend Analysis, Performance Reporting, Data-Driven Decision Making

AI & Machine Learning
Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, Llama 3, LangChain, RAG, AI Agents, Prompt Engineering, TensorFlow, PyTorch, Scikit-learn, YOLOv8, OpenCV, Vector Databases, FAISS, ChromaDB, Model Deployment, MLOps

Databases, Cloud & Tools
PostgreSQL, MongoDB, AWS, Docker, FastAPI, Git, REST APIs, API Integration, Cloud Deployment, CI/CD, Version Control

PROFESSIONAL EXPERIENCE

Prudle Labs Pvt Ltd, **Bengaluru** Aug 2021 – Mar 2025
Business Analyst & Project Coordinator (Technology)

- Collaborated with **15+ stakeholders**, including clients, product owners, QA teams, and developers, to gather requirements, define project scope, and deliver business solutions across Healthcare, E-commerce, and SaaS domains.

- Developed KPI dashboards and performance reports using **SQL, Excel**, and reporting tools to improve project visibility and operational efficiency.
- Supported the successful delivery of **3 enterprise products** serving **1,000,000+ end users**, ensuring alignment between business objectives and technical execution.
- Managed and prioritized **300+ Jira work items**, including user stories, defects, enhancements, change requests, and release activities across multiple Agile projects.
- Participated in **35+ Agile sprint cycles**, facilitating sprint planning, backlog refinement, estimation, sprint reviews, retrospectives, and release planning.
- Conducted **75+ stakeholder meetings**, requirement workshops, UAT sessions, sprint demonstrations, and project status reviews.
- Translated business requirements into functional specifications, user stories, acceptance criteria, and actionable development tasks for cross-functional teams.
- Coordinated **end-to-end SDLC activities**, including **requirements analysis**, development, **QA** validation, deployment support, release management, and post-production monitoring.
- Delivered and supported **50+ feature releases** while maintaining **95%+ sprint commitment achievement** through effective backlog management, risk mitigation, and Agile delivery practices.
- Coordinated and validated **100+ UAT scenarios**, improving release quality and contributing to a **25% reduction in defect resolution turnaround time**.
- Developed **KPI dashboards**, sprint reports, release notes, and stakeholder communications, providing visibility into sprint velocity, defect trends, delivery timelines, and project milestones.

PROJECTS & PORTFOLIO

Enterprise AI Chat Agents
Personal Project | 2025 – Present

- Developed enterprise-grade AI chat agents using Llama 3, LangChain, RAG pipelines, FAISS, and ChromaDB.
- Automated knowledge retrieval and customer support workflows using Generative AI technologies.
- Designed and optimized prompt engineering, vector search, and retrieval mechanisms for accurate responses.

Fire Detection System
Computer Vision Project | 2025

- Built a real-time fire detection solution using YOLOv8, OpenCV, and PyTorch.
- Developed automated monitoring and alert-generation workflows for early fire detection.
- Improved detection accuracy through dataset preparation, model training, and performance optimization.

AI-Powered Business & Consulting Websites
Digital Transformation & Business Solutions Portfolio | 2025

- Designed and deployed multiple business websites using AI-assisted development, prompt engineering, Node.js, and modern web technologies.
- Gathered business requirements, defined user journeys, and translated client needs into responsive web solutions.
- Implemented SEO-friendly, mobile-responsive interfaces focused on lead generation, branding, and customer engagement.
- Leveraged Generative AI tools and prompt engineering techniques to accelerate development cycles and improve delivery efficiency.
