ANAMIKA KUMARI

Aspiring QA Engineer | Software Testing & Quality Assurance
+91-9508744108 | anamikakum9@gmail.com | linkedin.com/in/anamika-kumari | github.com/anamika01kumari

CAREER OBJECTIVE

Detail-oriented MCA candidate with hands-on experience in full-stack web development and software testing, seeking a QA Engineer role in a technology-driven organization. Strong understanding of SDLC, STLC, and defect lifecycle — backed by practical exposure to API testing, debugging, and cross-browser validation through real-world MERN stack projects.

KEY SKILLS

Testing & QA: Manual Testing, Test Case Design & Execution, Bug Reporting, Regression Testing, UAT, Smoke Testing
API & Tools: Postman (API Testing), Git, GitHub, Browser DevTools
Database: MongoDB, MySQL, SQL (JOINs, GROUP BY, Subqueries)
Methodologies: Agile/Scrum, SDLC, STLC, Defect Lifecycle Management
Soft Skills: Analytical Thinking, Attention to Detail, Documentation, Team Collaboration

PROFESSIONAL EXPERIENCE

QA Intern – TechOrbitals Nov 2024 – Jan 2025

- Performed manual testing and debugging of full-stack web application modules, identifying and documenting UI bugs, API response errors, and database inconsistencies.
- Designed and executed test cases for RESTful APIs using Postman, validating request/response payloads, status codes, and error handling across multiple endpoints.
- Conducted cross-browser and responsive design testing to ensure consistent UI/UX across devices, logging defects and verifying fixes through regression testing.
- Collaborated in Agile/Scrum sprints to review requirements, raise quality risks early, and ensure all features met acceptance criteria before release.

KEY PROJECTS

JobVista – Job Portal (QA & Testing) | *MERN Stack, Postman, Git*

- Tested end-to-end user flows — job search, application tracking, and recruiter dashboard — designing test cases covering functional, regression, and boundary scenarios.
- Validated role-based authentication and authorization using Postman API testing, identifying and documenting security and access-control defects.

LMS Website – Quality Assurance | *React.js, Node.js, Express.js, MongoDB*

- Executed functional and UI test cases for course browsing, purchase flow, and admin panel — ensuring consistent behavior across roles (user and admin).
- Performed authentication and authorization testing to verify secure access, session management, and role-specific functionality without data exposure.

EDUCATION

Master of Computer Applications (MCA) Oct 2024 – Present
ABES Engineering College, Ghaziabad

Bachelor of Computer Applications (BCA) Oct 2021 – May 2024
School of Management Sciences, Varanasi

CERTIFICATIONS

- Web Development in React.js – Certified
- Full-Stack Development 101 – Certified
- Java Programming – Certified
