AMIT SHARMA

amitsharmaece25@gmail.com | +91 9518668145 | Palwal, Haryana, India | linkedin.com/in/amitsharma052

PROFESSIONAL SUMMARY

Motivated Electronics & Communication Engineering graduate actively pursuing CCNA certification, with a strong foundation in networking principles including TCP/IP, OSI Model, VLANs, Routing & Switching, Subnetting, and Cisco Packet Tracer. Hands-on experience in IoT, electronics systems, and technical testing environments. Eager to leverage analytical skills and networking knowledge in a Junior Network Engineer, NOC Engineer, or Network Trainee role. Committed to continuous learning, quick problem-solving, and delivering reliable network performance.

PROFESSIONAL EXPERIENCE

Fan BIS Laboratory | Presto Laboratories Pvt. Ltd., *Testing Engineer* 07/2025 – Present | Faridabad, India

- Conduct performance and compliance testing of electrical fans as per BIS (Bureau of Indian Standards) standards in an accredited testing laboratory.
- Operate and maintain testing instruments including digital multimeters, power analyzers, and measurement setups for electrical safety and efficiency parameters.
- Record, analyze, and document test data in standardized formats; identify deviations and escalate non-compliance issues.
- Collaborate with quality and engineering teams to ensure test procedures comply with IS/IEC standards.
- Skills Applied: Attention to detail, technical documentation, instrument handling, data analysis, teamwork.

JBM Auto Ltd., *Summer Intern Trainee - Manufacturing & Electronics* 07/2024 – 08/2024 | Palwal, India

- Observed and assisted in automated manufacturing processes, gaining exposure to industrial electronics, control panels, and production floor networking systems.
- Learned about the integration of PLC-based control systems and communication interfaces used in factory automation.
- Developed understanding of industrial-grade wiring standards and equipment safety protocols.

Solitaire Infosys, *Networking Intern* 07/2023 – 08/2023 | Remote

- Gained hands-on exposure to network setup and troubleshooting in a corporate IT environment.
- Assisted in LAN configuration including patch cabling, switch port assignment, and basic network connectivity verification.
- Observed real-world implementation of routing protocols, DHCP server configuration, and TCP/IP addressing schemes.
- Used remote access tools (TeamViewer) to assist in remote desktop support and network diagnostics.
- Developed foundational knowledge of network topology, data flow, and common troubleshooting steps aligned with CCNA curriculum.

EDUCATION

B.Tech - Electronics & Communication Engineering (ECE), 2022 – 2025 | Hisar, India
Guru Jambheshwar University of Science & Technology, Hisar

- Key Subjects: Computer Networks, Digital Electronics, Microprocessors, Signals & Systems, Wireless Communication, PCB Design, IoT

Diploma - Computer Engineering (CE), *Govt. Polytechnic, Manesar* 2020 – 2022 | Manesar, India

Senior Secondary (XII) - Science Stream, *BVN Sr. Sec. School, Khambi, Palwal* 2019 – 2020 | Palwal, India

TECHNICAL SKILLS

Networking Concepts
OSI Model, TCP/IP Stack, Subnetting, IPv4/IPv6, VLANs, Inter-VLAN Routing, Trunking (802.1Q)

Tools & Simulators
Cisco Packet Tracer, TeamViewer, Wireshark (basic), Arduino IDE, Proteus

Routing & Switching
Static Routing, Default Routing, STP (Spanning Tree Protocol), Router-on-a-Stick, Basic OSPF Concepts

Hardware & Systems
Routers, Switches, Patch Panels, LAN/WAN Cabling (Cat5e/Cat6), PCB Design

Network Protocols
DHCP, DNS, FTP, HTTP/HTTPS, ARP, ICMP, NAT/PAT

Electronics & Embedded
Arduino UNO, IoT Sensors, Solar/Renewable Energy Systems, PCB Layout

Network Security
Firewall Basics, ACLS (Access Control Lists), Network Monitoring, Port Security

Operating Systems
Windows (10/11), Linux (basic CLI), Command Prompt/ Network Commands (ping, tracert, ipconfig, nslookup)

SOFT SKILLS & ADDITIONAL INFORMATION

Hindi/English
Clear written and verbal communication skills

CERTIFICATIONS & TRAINING

Cisco Certified Network Associate (CCNA 200-301)

- Issuer: Cisco/Authorized Training Institute(Network Kings)
- Date: 2026-01-04

B.Tech Electronics & Communication Engineering
Completed: 2025

Networking Internship Training

- Issuer: Solitaire Infosys
- Date: 2023-08

Diploma in Computer Engineering

- Issuer: Govt. Polytechnic, Manesar
- Date: 2022

SOFT SKILLS & ADDITIONAL INFORMATION

General

- Strong analytical and systematic troubleshooting mindset ability to isolate network faults layer by layer.
- Quick Learner with ability to adapt to new technologies, tools, and environments rapidly.
- Team-oriented and collaborative proven in internship environments across manufacturing and IT sectors.
- Self-motivated with discipline to pursue CCNA certification alongside professional work commitments.
- Attention to detail and commitment to quality experienced in standards-based testing and documentation.

PROJECTS

Enterprise Network Design & VLAN Configuration, *Cisco Packet Tracer*

- Designed a multi-department enterprise network topology in Cisco Packet Tracer with routers, switches, and end devices.

- Configured VLANs for HR, Engineering, and Admin departments; implemented Inter-VLAN Routing via Router-on-a-Stick.
- Applied DHCP server configuration for dynamic IP allocation and verified end-to-end connectivity using ping and traceroute.
- Implemented 802.1Q trunking on switch uplinks and configured port-based VLAN access for hosts.
- Tools Used: Cisco Packet Tracer, TCP/IP Protocols, VLAN, DHCP, Routing

Smart IoT Extension Board, *Remote Controlled via Android App*
- Developed an IoT-based smart extension board with six independently controllable AC sockets, enabling remote switching via an Android application over Wi-Fi.
- Programmed the Arduino microcontroller to handle relay switching logic and wireless communication protocols.
- Designed PCB layout and circuit schematic; tested for load handling and remote response latency.
- Relevance: Demonstrates understanding of device communication, protocol handling, and embedded network control.

Basic Network Troubleshooting Simulation, *LAN Fault Diagnosis*
- Simulated common LAN faults including IP conflicts, misconfigured default gateways, and broken trunk links in Cisco Packet Tracer.
- Applied OSI Model layered troubleshooting methodology to isolate and resolve network issues systematically.
- Used network diagnostic commands: ping, ipconfig, tracert, arp -a to identify faults at Layer 2 and Layer 3.
- Documented findings in a structured fault-analysis report, including root cause and corrective actions.

Portable Solar Power Bank, *Hybrid Energy System*
- Designed and built a portable solar-powered energy storage unit utilizing a lithium-ion battery for both solar charging and grid charging modes.
- Integrated charge controller circuitry to manage solar panel input, battery management, and DC output regulation.
- Demonstrates understanding of power systems, energy conversion, and circuit design applicable to network equipment power backup (UPS concepts).

Radar System Using Arduino & Ultrasonic Sensor, *Object Detection*
- Built a functional radar system using an Arduino UNO and HC-SR04 ultrasonic sensor, with real-time object detection plotted on a Processing IDE-based graphical display.
- Programmed sensor polling logic and serial communication between Arduino and PC-demonstrating data acquisition and device interfacing skills.
