ASHWINI MOURYA

Gwalior, Madhya Pradesh

+91-8109729284 — ashwinimourya14899@gmail.com — LinkedIn — GitHub

Education

Indian Institute of Information Technology and Management, Gwalior, India **2024 – 2026**

M.Tech in Wireless Networks and Computing — ***CGPA: 8.30***

Madhav Institute of Technology and Science, Gwalior, India **2018 – 2022**

B.Tech in Electrical Engineering — ***CGPA: 7.90***

Experience

Stallion Archisys Ltd **Jan 2022 – May 2022**

Software Developer Intern

- Developed dynamic web forms and responsive front-end interfaces using HTML, CSS, and JavaScript to improve user interaction.
- Collaborated in agile development processes including sprint planning, debugging, and peer code reviews to maintain code quality.
- Enhanced UI responsiveness and functionality across multiple devices and browsers.

Elite Techno Groups **Aug 2021 – Sep 2021**

Intern – Electric Vehicle Systems

- Gained hands-on experience with EV components including BMS, motor controllers, and power electronics.
- Assisted in subsystem integration, performance analysis, and technical documentation for EV prototypes.

Projects

Latency-Aware Causal Consistency Framework for Edge Computing

- Designed a latency-aware causal consistency framework using CCML, Hybrid Logical Clocks (HLC), and Adaptive Log Compaction for seamless edge mobility.
- Implemented secure state synchronization and low-latency handovers using HMAC and Forward Error Correction (FEC) on a Mininet.
- Optimized migration efficiency and ensured deterministic state transfer in distributed edge environments.

Dynamic Resume Builder Web Application

- Developed a responsive single-page resume builder using HTML, CSS, and JavaScript with dynamic form handling and real-time PDF export support.
- Implemented responsive UI design using CSS Flexbox and media queries for seamless cross-device compatibility.

Infrared-Based Contactless Temperature Monitoring System

- Built an Arduino-based touchless temperature monitoring system using the MLX90614 IR sensor and LCD display with fever alert integration.
- Enabled accurate and hygienic thermal screening through threshold-based real-time monitoring.

Hybrid Renewable Energy System with Wind-Solar Integration

- Designed a hybrid renewable energy system integrating solar PV and wind turbine sources with intelligent power switching and battery backup.
- Implemented MPPT-based optimization for efficient energy utilization and off-grid power supply.

Technical Skills

- **Languages:** C, C++, HTML, CSS, JavaScript
- **Databases:** MySQL
- **Tools & Platforms:** GitHub, VS Code, Mininet
- **Core Concepts:** Data Structures, DBMS, Computer Networks

Certifications

C Programming – Udemy

- Learned programming fundamentals, structured programming, and syntax implementation in C.
- Strengthened problem-solving abilities through coding exercises and practical challenges.

C++ Basics – Coursera

- Gained understanding of object-oriented programming concepts and core C++ features.
- Improved logic-building skills through hands-on coding assignments and practice problems.

Achievements

- Qualified **GATE 2024** demonstrating strong analytical and technical problem-solving skills.
