DEEPAK KUMAR PRASAD

Aspiring Data Analyst

+91-7370006239 | deepak171220@gmail.com | Bhopal, MP

LinkedIn | GitHub | Portfolio | LeetCode

SUMMARY

Aspiring Data Analyst with hands-on experience in SQL, Python, Power BI, and Excel. Completed 3 end-to-end data analytics projects — analyzing 40K+ user interactions, 5,000+ customer records, and 8,500+ retail records. Skilled in data cleaning, visualization, dashboard development, KPI reporting, and translating raw data into actionable business insights.

TECHNICAL SKILLS

- **Programming & Query Languages:** SQL | Python
- **Data Analytics & Visualization:** Power BI | MS Excel (Advanced) | Data Cleaning | Data Visualization | Dashboard Development | KPIs Reporting | MIS Reporting | Exploratory Data Analysis (EDA)
- **Database:** MySQL | PostgreSQL
- **AI & Emerging Technologies:** Generative AI | Prompt Engineering | AI-Assisted Analysis
- **Tools & Platforms:** Git | GitHub | Jupyter Notebook | MS Office | Power BI Service

PROJECTS

Funnel Deep Dive — Conversion Analysis Link

Jan 2026 - Mar 2026

SQL | Python | Power BI | MySQL

End-to-end funnel analysis project identifying user drop-off patterns across 4 conversion stages to drive data-driven optimization decisions.

- Analyzed 40,000+ user interactions across 4 funnel stages (Browse → Cart → Checkout → Purchase) using SQL and Python to identify conversion bottlenecks
- Designed 3-page Power BI dashboard covering funnel overview, drop-off diagnostics, and customer behavior insights with KPI tracking
- Optimized checkout stage targeting — contributed to 70% improvement in conversion rate through data-driven recommendations

CBIA — Customer Behavior Intelligence & Analytics Link

Apr 2026 – May 2026

Python | MySQL | Power BI | DAX | Excel | Scikit-Learn

End-to-end customer analytics project combining ML modeling and BI dashboard to enable actionable decisions on retention and revenue growth.

- Analyzed 5,000+ customer records across 22 behavioral features (Jan 2023–Dec 2024) to identify churn risk, segmentation, and lifetime value patterns
- Applied RFM Scoring, KMeans Clustering, CLV Prediction, and Churn Modeling using Python and Scikit-Learn for customer segmentation
- Delivered 5-page interactive Power BI Dashboard with DAX measures and dynamic slicers to support revenue and retention decisions

Blinkit Data Analysis — Sales & Outlet Performance Link

Nov 2025 – Jan 2026

Python | SQL | Power BI | Excel

Retail analytics project analyzing Blinkit grocery sales data to uncover outlet performance trends and product-level findings across city tiers.

- Analyzed 8,500+ Blinkit grocery records to identify sales patterns across outlet types, item categories, and fat content segments
- Compared outlet performance across Supermarket Tier 1, 2, 3 and Grocery Stores — tracking $1.2M+ Total Sales across categories
- Built Excel + Power BI dashboard tracking revenue, average ratings, and item-level performance for inventory and sales decisions

EDUCATION

Bachelor of Technology — Computer Science & Engineering July 2022 – June 2026

IES College of Technology, Bhopal (RGPV) | CGPA: 7.56

Bihar School Examination Board — Class XII | Percentage: 63.2% | First Division

CERTIFICATIONS

- SQL Intermediate Certificate — HackerRank Link
- Data Analytics Job Simulation — Deloitte (Forage) Link
- Microsoft Power BI — Infosys Springboard Link
- Career Essentials in Generative AI — Microsoft & LinkedIn Learning Link
- Prompt Engineering for Data Analytics — Udemy Link
