PROFESSIONAL SUMMARY

Final-year CSE graduate, published author, and national hackathon winner with hands-on experience building and deploying production-grade AI systems. Currently interning as an AI Engineering Intern at Abhiwan Technology, developing LLM pipelines, RAG-based document assistants, and prompt-optimized inference systems. Skilled in Python, LangChain, LangGraph, FAISS vector databases, NLP, and computer vision. Built 3 deployed AI projects including a fully offline multimodal assistant and a live OCR-based prescription reader. Seeking an AI Engineer or ML Engineer role to contribute end-to-end model development, RAG pipelines, and real-world GenAI deployment.

EDUCATION

B.Tech, Computer Science and Engineering ***Expected May 2026***
RVS College of Engineering and Technology, Jamshedpur | *Jharkhand University of Technology*

Intermediate (CBSE) ***2021***
Delhi Public School, Raigarh

Matriculation (CBSE) ***2019***
Netaji Subhas Public School, Durku

PUBLICATION

Author — Astronomy & Philosophy Book ***2025***
Self-published | *First Edition*

- Authored and independently published a full-length book blending scientific astronomy with philosophical reflection on human existence and the cosmos.
- Covers topics including the origin of the universe, galaxy evolution, and the conditions enabling life on Earth — presented for both science readers and general audiences.
- Demonstrates scientific communication, long-form writing, and the ability to translate complex concepts into accessible, engaging prose.

WORK EXPERIENCE

AI Engineering Intern ***May 2026 – Present***
Abhiwan Technology, Remote

- Developing and deploying generative AI pipelines using LLM integration, prompt engineering, and LangChain for production use cases.
- Optimizing model inference for real-time response; reduced pipeline latency by ~30% through prompt caching strategies.
- Building RAG-based document assistants with FAISS and ChromaDB vector databases for enterprise knowledge retrieval.

Machine Learning Intern ***Jun 2024***
Cognition Enterprises, Rakha

- Trained 4+ supervised and unsupervised ML models (Random Forest, SVM, K-Means) for industrial sensor data analysis using Scikit-learn and Pandas.
- Performed end-to-end data preprocessing, feature engineering, and model evaluation; achieved ~85% classification accuracy on real-world datasets.
- Automated model evaluation reports using Python scripts, reducing manual analysis time by approximately 40%.

Python Automation Intern ***Jun 2023***
Jindal Steel, West Raigarh

- Automated 5+ daily data processing workflows using Python, Pandas, openpyxl, and scheduled scripts, reducing reporting time by ~35%.

- Built reusable pipeline scripts for CSV extraction, transformation, and structured report generation.

PROJECTS

NAIF – Offline Multimodal AI Assistant **Python, Ollama, LangChain, RAG, FAISS, OpenCV, YOLOv8 | 2025–2026**

- Built a fully offline AI assistant using Gemma 3 (4B) and Qwen2.5 Coder (7B) via Ollama with 5 integrated modules: conversational AI, coding help, healthcare queries, face recognition, and CCTV surveillance.
- Implemented RAG pipeline with LangChain and FAISS vector embeddings; deployed as a local web server with sub-3s response latency on consumer hardware.
- Containerized deployment environment using Docker (basic); documented setup for open-source contributors on GitHub.

AI Prescription Reader **Python, Tesseract OCR, NLP, TF-IDF, Streamlit | 2025**

- Extracted and interpreted handwritten/printed doctor prescriptions using Tesseract OCR with 90%+ text detection accuracy on clear scans.
- Classified medicine names, dosages, and instructions using TF-IDF and NLP; deployed publicly on Streamlit Cloud.

RAG Document Q&A System **Python, LangChain, LLM, FAISS Vector DB | 2025**

- Built an end-to-end RAG pipeline enabling natural language querying over custom documents with grounded, hallucination-reduced responses.
- Used FAISS vector store with sentence embeddings for similarity search; fully open-sourced on GitHub. Tested deployment on Google Cloud Run (basic).

TECHNICAL SKILLS

Languages: Python, SQL

AI / ML: LangChain, LangGraph, RAG, LLM, Prompt Engineering, NLP, Scikit-learn, Pandas, NumPy, EDA

Computer Vision: OpenCV, YOLOv8, OCR (Tesseract)

Cloud & Tools: Google Cloud Run (basic), AWS S3 (basic), Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, VS Code, Ollama, Docker (basic)

Databases: SQLite, FAISS, ChromaDB

Exposure: Generative AI, Fine-tuning, LlamaIndex, Statistical Analysis, Hugging Face Transformers (basic)

CERTIFICATIONS

MLOps with Vertex AI: Model Evaluation — Google Cloud *(2026)*

MLOps for Generative AI — Google Cloud *(2026)*

Generative AI — IBM via Coursera *(2026)*

RAG and Agentic AI — IBM via Coursera *(2026)*

Machine Learning — Cognition Enterprises *(2025)*

Python for Data Analysis — Great Learning *(2024)*

Artificial Intelligence — Skolar *(2023)*

ACHIEVEMENTS & ACTIVITIES

- Published Author: Authored and published a book on astronomy and human existence, 2025.
- Hackathon Winner – HackHorizon (National Level): Led team to 1st place, Apr 2025.
- National Participant – BIT Sindri Hackathon: Competed among top teams nationwide, May 2025.
- Hackathon Organizer – HackQubit: Organized and managed college-level hackathon event, Oct 2025.
