PROFESSIONAL SUMMARY

Final-year B.Tech CSE (AI-ML) student at RKGIT with hands-on experience in backend development (Node.js, FastAPI, REST APIs) and AI/ML engineering (LangChain, RAG pipelines, NLP). Built production-ready projects combining LLMs with backend services. Seeking a full-time fresher role at a startup where I can contribute immediately to backend or AI/ML engineering.

WORK EXPERIENCE

QMANSYS Infosolutions LLP (NASSCOM Member) — **AI/ML Intern** Jul 2025 – Oct 2025 | Remote

- Designed and developed a Fake News Detection application using Python, NLP, and Machine Learning, achieving 87% classification accuracy on a dataset of 10,000+ news articles.
- Implemented full NLP pipeline including text preprocessing, TF-IDF vectorization, and Logistic Regression / Naive Bayes classifier for binary classification.
- Built an end-to-end web interface to check news authenticity, reducing manual verification effort for test users by ~60%.
- Collaborated with a team of 3 engineers; managed code versioning on GitHub with 15+ commits and pull request reviews.

PROJECTS

RAG-Based Document Q&A System | *Tech: LangChain, LLM, Vector Embeddings, FAISS, Python*

- Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain to enable context-aware Q&A over external documents, reducing hallucination rate vs. vanilla LLM by ~40%.
- Implemented semantic chunking, text embeddings, and FAISS vector search to retrieve top-k relevant passages before LLM generation.
- Integrated with OpenAI/HuggingFace LLMs; tested on 5+ document types including PDFs and plain text files.

Secure Online Voting System — REST API | *Tech: Node.js, Express.js, MongoDB, JWT, Bcrypt*

- Developed a production-ready RESTful API for online voting supporting 500+ concurrent users with JWT-based authentication and role-based access control (Admin / Voter).
- Enforced one-person-one-vote logic at the database level using MongoDB transactions; implemented bcrypt password hashing (salt rounds: 10).
- Built full CRUD for candidate management and real-time result aggregation endpoint; tested all routes with Postman.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++

Backend: Node.js, Express.js, FastAPI, REST APIs, Microservices basics

AI / ML / GenAI: LangChain, LangGraph, RAG pipelines, LLM integration, NLP, TF-IDF, Text Embeddings, Vector Search (FAISS), Prompt Engineering

Frontend: React.js, Redux, HTML, CSS, Tailwind CSS

Databases: MongoDB, MySQL, PostgreSQL (basics)

Tools & DevOps: Git, GitHub, Postman, VS Code, Docker (basics)

Core CS: Data Structures & Algorithms, OOPs, Problem Solving

EDUCATION

Raj Kumar Goel Institute of Technology (RKGIT) 2022 – 2026

B.Tech in Computer Science & Engineering (AI-ML) | CGPA: 7.2

CERTIFICATIONS

- Generative AI for Everyone — DeepLearning.AI / Coursera
- NASSCOM Internship Completion — QMANSYS Infosolutions (AI/ML, 3 months)
