SUMMARY

Recent B.Tech graduate from IMS Engineering College, Ghaziabad, with a solid foundation in programming, data analysis, and core engineering principles. Proficient in Python and experienced with tools such as Jupiter Notebook and data visualization libraries, applied in real-world projects during academic coursework and training. Demonstrated problem-solving and analytical skills through internships and hands-on projects involving data cleaning, feature extraction, and statistical analysis. Seeking a dynamic role in Data Analytic or Software Development to contribute technical expertise and a strong commitment to continuous learning

EDUCATION

IMS Engineering College Gzbd /AKTU

Bachelor of Technology/Engineering (CSE)

Nov 2022 – June 2026

CGPA - 6.5/10 (Till Now)

SKD Inter College/UP Board

12th (Intermediate)

2020 – 2021

CGPA- 7.84 (78.4%)

SKD Inter College/UP Board

10th (High School)

2018 – 2019

CGPA- 7.73 (77.33%)

SKILLS

- Java, Python
- HTML, CSS, Basic React, Java Script
- OOPS Concepts
- DBMS, SQL Server 2019, MySQL, MongoDB
- Windows Server 2008, Window 11,10, 8, 7, XP, Visual Studio 2022,2019, 2017, 2015, 2012
- Git, Visual Studio Code

CERTIFICATIONS /TRAININGS

- Java (DSA) Pre Placement Training from SKILLRISERS INFOTECH PVT LTD, Ghaziabad – 07 July To 10 Nov 2025
- Data Analytic using python from SHAPEMYSKILL Pvt Ltd. - Jan 2024

ACHIEVEMENTS

- Active participant in coding contests, quizzes, and technical workshops.
- Contributed to departmental project exhibition or hackathon as a lead/project member

ACADEMIC EXPERIENCE

Internship Experience

Project- URL Shortener

- Based on long and wide URL being are any link and picture that short the URL and Give small size
- Web side by developed React /Next.js (frontend) and Node.js with Express.js power the Back-end and MongoDB (DATA BASE) flexible and scalability - 10 Nov 2025

Academic Projects

Block Chain Security System

Sept 2023 – Nov 2023

- Every use has a public key (like an address) and a private key (like a password). Transactions are signed with the private key and can be verified with the public key.
- Block chain cryptography (especially public key cryptography) To secure the data and control user access.

Airline Reservation System

Sept 2023 – Nov 2023

- A web-based application designed to streamline the process of booking and managing airline tickets. The system allows users to search flights, make reservations, cancel bookings, and view ticket details. Admins can manage flight schedules, user data, and seat availability.
- Designed and implemented database schema using MySQL, covering tables for users, flights, bookings, and transactions.
- Developed core logic in Python for ticket booking, seat allocation, flight search (by route/date), and cancellation modules.
- Applied data validation techniques to ensure accurate input/output processing and secure transaction handling.

ADDITIONAL INFORMATION

- Strong Analytical and Problem-Solving Skills
- Quick Learner with a Passion for Technology
- Excellent Communication and Presentation Skills
- Adaptable and Eager to Learn New Tools & Technologies.
