## PROFESSIONAL SUMMARY

Final-year B.Tech student in Computer Science (Data Science) with a strong foundation in Data Structures & Algorithms, machine learning, and backend development. Proficient in Python, Java, SQL, and Power BI, with hands-on internship experience building predictive models and automating workflows. Passionate about solving real-world problems through data-driven approaches and scalable software solutions.

## EDUCATION

**J.S.S Academy of Technical Education, Noida** *2023 – 2026*
B.Tech — Computer Science Engineering (Data Science), Cgpa-7.5

**Little Flower Polytechnic, Gorakhpur** *2020 – 2023*
Diploma in Engineering, Cgpa-7.8

## EXPERIENCE

**Brainwave Matrix Solution** *Aug 2025 – Oct 2025*
Data Science Intern

- Built and validated machine learning models for predictive analytics, improving forecast reliability.
- Automated data preprocessing workflows, reducing manual effort by 30% and accelerating reporting cycles.
- Processed and visualized large datasets using Python and Power BI to surface actionable business insights.

## PROJECTS

**Walmart Sales Sentiment Analysis (**Python · NLP · LSTM · Scikitlearn**)**

- Performed sentiment analysis on customer review dataset using NLP techniques and LSTM neural networks.
- Achieved 88% classification accuracy through advanced preprocessing, tokenization, and hyperparameter tuning.
- Evaluated model performance using precision, recall, and F1-score metrics; documented findings in a structured report.

**Bank Management System (**Python · Streamlit · JSON**)**

- Developed a full-featured banking application supporting account creation, deposits, withdrawals, and transaction history.
- Designed an intuitive UI using Stream-lit and implemented persistent JSON-based data storage.

**Travel Website — Wanderlust (**HTML · CSS · JavaScript**)**

- Designed and developed a fully responsive travel website with interactive UI components and smooth navigation.
- Implemented dynamic features for destination browsing, enhancing user engagement and experience.

**UPI Fraud Detection (** Python, XGBoost, Flask/FastAPI**)**

- Applied anomaly detection techniques on financial transactions.
- Integrated ML model with API endpoints using Flask and FastAPI.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript
**Data Tools:** SQL, Pandas, NumPy, Matplotlib, Power BI, Excel
**Frameworks & Libraries:** Scikit-learn, LSTM, Flask, FastAPI, Streamlit
**Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST APIs
**Tools:** Git, GitHub, VS Code, Jupyter Notebook

## CERTIFICATIONS

- Data Analytics & Visualization Job Simulation — *Forage*
- Python Programming — *Infosys Springboard*
- Object-Oriented Programming with Java — *Infosys Springboard*
- Time Management — *Infosys Springboard*

## KEY ACHIEVEMENTS

- Reduced manual data processing effort by 30% through workflow automation during internship at Brainwave Matrix Solution.
- Achieved 88% classification accuracy on sentiment analysis project using NLP and LSTM techniques.
- Built 4+ end-to-end projects spanning machine learning, web development, and backend systems and continuously practicing DSA.
