Professional Summary

Full Stack Developer Intern at AventIQ building production-grade MERN applications with Docker, JWT authentication, and REST APIs. Computer Science graduate (2026) with hands-on experience in containerized deployments, MVC architecture, and real-time systems using Socket.io. Seeking a Software Engineer, Full Stack Developer, or Backend Developer role to contribute to scalable, collaborative engineering teams.

Technical Skills

Languages: JavaScript (ES6+), Core Java, C
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive UI Design, Component Architecture
Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io
Databases: MongoDB, SQL, Redis, Database Design, CRUD Operations
DevOps & Cloud: Docker, GitHub Actions (CI/CD), AWS (Cloud Practitioner),Lambda, AWS S3
Tools & Workflow: Git, GitHub, Agile/Scrum, Manual Testing
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Networking

Internship Experience

Full Stack Developer Intern Apr 2026 – Present
AventIQ *Noida, UP (On-site)*

- Engineered backend APIs for a Trademark Management System using AWS Lambda and MongoDB, enabling end-to-end trademark lifecycle tracking and document management.
- Integrated AWS S3 and Sandbox Bank Verification APIs to automate document handling and employee onboarding verification workflows.
- Diagnosed and resolved 10+ production issues across frontend and backend systems, improving application stability and API reliability.
- Containerized services using Docker and collaborated through Git/GitHub workflows, pull requests, and code reviews within a 5+ member Agile team.

Projects

Real-Time Chat Application Sept 2025 – Dec 2025
Node.js, Express.js, MongoDB, Socket.io, React.js, Tailwind CSS, JWT

- Developed a real-time chat application supporting one-to-one and group messaging using WebSockets via Socket.io, handling concurrent connections with room-based event routing.
- Built 8+ responsive React.js UI components with Tailwind CSS and integrated REST APIs for seamless client-server communication.
- Implemented JWT-based authentication and bcrypt password hashing, securing user sessions with token expiry and refresh logic.

Weather Dashboard App Jan 2025 – Feb 2025

React.js, OpenWeatherMap REST API, Git

- Built a fully responsive weather dashboard consuming the OpenWeatherMap REST API to display real-time temperature, humidity, and wind speed with dynamic UI updates across 5+ city locations.
- Applied React component architecture and hook-based state management; practiced Git feature branching and commit hygiene to simulate team-based development workflows.

Education

Greater Noida Institute of Technology Greater Noida, UP
B.Tech – Computer Science and Engineering – 76% *2022 – 2026*

Dr. Brij Kishore Dubey Memorial School Kanpur, UP
Class XII (CBSE) – 87.5% *2021*

Dr. Brij Kishore Dubey Memorial School Kanpur, UP
Class X (CBSE) – 92.2% *2019*

Certifications

- **AWS Cloud Practitioner Essentials** Coursera *Sept – Oct 2024*
- **Introduction to Machine Learning** NPTEL – IIT Madras *Jul – Oct 2025*
