RISHABH

rishu081.ai@gmail.com +91-9540805409 081rishu 081rishabh

AI Engineer with 1 year of experience building production AI systems, scalable FastAPI backends, and intelligent automation. Experienced with LLMs, multimodal AI, cloud-native infrastructure, and backend architecture.

EXPERIENCE

Antigravitee Technologies Pvt. Ltd. | AI Systems Consultant (Contract) March 2026 – April 2026

- Architected a microservice-based backend for an AI platform, decomposing a monolith into services for authentication, orchestration, Google Workspace integrations, and asynchronous AI workloads.
- Built backend services with FastAPI, PostgreSQL, MongoDB, Redis, GCP Pub/Sub, and Inngest for event-driven AI workflows and background processing.
- Developed reusable authentication and integration services with JWT, OAuth 2.0, Google Workspace APIs, and multi-provider LLMs (OpenAI, Anthropic).
- Implemented real-time AI orchestration using WebSockets, modular service communication, and asynchronous task execution.

Python Backend Engineer | Intellemo.ai Dec 2025 – Jan 2026

- Built a scalable data curation pipeline for an Indic lip-sync model using yt-dlp, MediaPipe FaceMesh, facial pose estimation, and batch processing.
- Developed backend services for web crawling, product extraction, audience segmentation, and workflow automation using FastAPI, Playwright, Python, and Google Cloud Run.
- Developed core components of a multimodal content generation pipeline, contributing to script planning, scene generation, voice synthesis, and AI-assisted video generation.
- Researched and implemented components of a diffusion-based lip-sync pipeline, including dataset preparation and multilingual speech-driven facial animation.

AI/ML Engineer Intern | Wasserstoff May 2025 – Oct 2025

- Built backend infrastructure powering 15+ AI automation pipelines across text, image, audio, video, and document processing using FastAPI, REST APIs, and Render.
- Built production automation and data acquisition systems using Playwright, Python, and browser automation for legal, compliance, insurance, and social media platforms, including a real-time Telegram bot for Supreme Court, Delhi High Court, and NCLAT case notifications.
- Developed multimodal AI pipelines for viral video clipping, audio enhancement, carousel generation, AI content creation, autonomous social agents, and automated posting workflows.
- Developed coordination agents, reusable backend services, and LLM-powered automation frameworks.

PROJECTS

Agentic Clinical Document Intelligence System | GitHub

- Agentic AI system for extracting structured discharge summaries from clinical PDFs using GPT-4o Vision, retrieval, tool calling, and stateful reasoning.

AI Video Intelligence Pipeline | GitHub

- Multimodal AI pipeline for identifying and extracting high-retention clips from long-form videos using transcript analysis, scene detection, CLIP-based visual scoring, and LLM reasoning.

SKILLS

- Languages: Python, Java, SQL
- AI/ML & Backend: Agentic AI, Generative AI, LLMs, Multimodal AI, NLP, Computer Vision, FastAPI, REST APIs, WebSockets, PostgreSQL, MongoDB, Redis
- Cloud & Tools: GCP, Cloud Run, Pub/Sub, Docker, Render, Playwright, OpenCV, MediaPipe, Git

EDUCATION

BACHELOR OF TECHNOLOGY, COMPUTER SCIENCE AND ENGINEERING (specialized in AI/ML) Sep 2021 – May 2025
SUSHANT UNIVERSITY, GURUGRAM CGPA: 7.7
