OBJECTIVE

I recently worked as a Python Developer, but I have a high degree of interest, passion, and knowledge in Full Stack Development, specializing in creating interactive user interfaces using MERN stack technology. I want to design UI/UX for my company or clients, enabling users to interact with websites and access products and services seamlessly. I focus on creating effective UI/UX designs that ensure smooth and fast interactions between users and businesses. Through my work and self-learning, I gained exposure to different technologies, and I concluded that I want to build my career in Web and Software Development, as it aligns perfectly with both my short-term and long-term goals.

EXPERIENCE

- **Share India Securities Ltd.** **JANUARY 2025 - June 2025**
  Recently worked at "**Share india**" subsidiary company "**Ace Alpha Tech**" as a Python Developer, where I designed trade algorithms, built GUI software for clients and works on REST Api's etc. Here I touch and learn most aspects of logical programming.

EDUCATION

- **PDM UNIVERSITY** **2020-2024**
  B -TECH IN COMPUTER SCIENCE & ENIGNEERING
- **RAMJAS HIGHER SECONDARY SCHOOL NO. 5** **2018-2020**
  SENIOR SECONDARY EDUCATION

SKILLS

- HTML5, CSS, JAVASCRIPT, PYTHON
- REACT, REDUX, BOOTSTRAP
- NODE J.S, EXPRESS J.S
- MONGO D.B, POSTGRESQL, REDDIS

PROJECTS

- **PASSWORD GENERATOR**
  Designed and developed a Random Password Generator using HTML, CSS, JavaScript, and React. The application enables users to generate strong and secure passwords based on customizable parameters, including password length and the inclusion of numbers, uppercase and lowercase letters, and special characters.
- **JUSTPLAY(MP3 PLAYER)**
  Developed a Music Player using HTML, CSS, JavaScript, and React. The application features an interactive user interface that allows users to play, pause, and control audio playback.
- **ADVAIT(VOICE ASSISTANT)**
  Developed a voice assistant as a minor project in the 6th semester using Python and libraries such as SpeechRecognition, pyttsx3, OS, webbrowser, and Wikipedia. The application performs basic voice commands through predefined logical programming without self-learning capabilities.
- **SHOPNOW(E-COMMERCE)**
  Developed a full-stack E-commerce website using HTML, CSS, JavaScript, React, Redux, Node.js, Express.js, and MongoDB (Mongoose). The application fetches products from an API, allows users to browse and purchase items, and includes secure payment integration using Razorpay.

INTERESTS

- Doing Leadership tasks
- Voice Search Optimization
- 3D elements on the U.I
- Single Page Application
- Microinteractions

- Microservices

LANGUAGE

- HINDI : NATIVE
- ENGLISH : INTERMEDIATE
- FRENCH : BEGINNER

CERTIFICATIONS

- **PROBLEM SOLVING ASPECTS AND PYTHON PROGRAMMING**
  CERTIFIER : NATIONAL TESTING AGENCY
- **SQL FOR DATA ANALYTICS**
  CERTIFIER : INTERSHALA
